GIRLS! WHITEN YOUR SKIN  
WITH LEMON JUICE

Make a beauty lotion for a few cents to remove tan, freckles, sallowness.

Your grocer has the lemons and any drug store or talker counter will supply you with three ounces of orchard white for a few cents. Squeeze the juice of two fresh lemons into a bottle, then put in the orchard white and shake well. This makes a queer pink of the very best lemon skin whitener and complexion beautifier known. Massage this fragrant, creamy lotion daily into the face, neck, arms and hands and just see how freckles, tan, sallowness, redness and roughness disappear and how smooth, soft and clear the skin becomes. You'll be satisfied, and the beautiful results will surprise you!

Glad to It.

"You know there are spots on the sun," he remarked as they lounged on the beach.

"Well," replied the summer girl, "don't understand why you take such interest in trade reports."

"I'm glad the old thing has a few free-kick himself and can see how he likes it."

"Well, when other men are prosperous I find it easier to make a truck."

HARVEST HANDS WANTED  
IN NEW BRUNSWICK

The Department of Agriculture, for war purposes, last spring urged Greater Production. 103,772 bushels of seed grain were imported. The farmers have responded splendidly. The acreage under crop is in excess of any previous year. Climate conditions have been favorable, crops promise well.

Every acre of crop in this province must be promptly harvested this year. Many men have been called to the colors.

Under the conditions the Department fears that many crops will remain in the fields unless men from our towns and industrial plants become harvesters, and are setting up labor bureaus in different sections of the province to ascertain the farmers' labor needs and to register voluntary labor.

Every man in the towns or cities who has had farm experience should be ready to assist for a few days.

Every farmer should register his wants immediately at one of the following bureaus. A guarantee of help cannot be given by the Provincial Department of Agriculture but when the requirements are known after a certain date, if necessary, the Dominion authorities will be appealed to.

Give name, address, railway station, number of days help required and when. Approximate wages per day. Where wages cannot be satisfactorily arranged, an appeal to the Department of Agriculture may be made for adjustment.

Every man willing to help should be registered at one of the following places:

ST. JOHN—William Kerr, N. B. Government Office, Prince William St.  
FREDERICTON—A. B. Wilmot, Dom. Immigration Office, P. O. Bldg.  
SUSSEX—J. D. McKenna.  
MONCTON—J. H. King, Agricultural Representative.  
CHATHAM—James Bremner, Jr.  
BATHURST—Frank P. Doucet. CAMPBELLTON—E. A. LeGallais.  
ANDOVER and PERTH—Dr. Dickenson.  
WOODSTOCK—A. C. Taylor, Agricultural School.  
ST. STEPHEN—W. T. Stevens. Aug. 8-2-wks.  
J. F. TWEEDDALE, Minister of Agriculture.

## TEUTONS FIGHT

## OVER THE SPOILS

London, Aug. 15.—The Polish question will be discussed at the conference now proceeding between Emperor William of Germany and Emperor Charles of Austria at the German main headquarters, the Vienna correspondent of the Berlin Tageblatt says definitely according to a despatch from Amsterdam to the Central News. Baron Burián, Austro-Hungarian foreign secretary, consider that the Austrian solution of the question is the only one acceptable to Austria-Hungary, but it is understood that this solution is not acceptable to Germany. Interesting developments are expected, the despatch says.

## BOLSHEVIKI SEE

## END OF REGIME

Stockholm, Aug. 19.—The social Democrat publishes a report sent from Petrograd, Aug. 8th, by a Swedish socialist, saying that the Slovak "advance on Moscow" is expected to result any day in the Russian government officials returning to Petrograd. The latest Soviet mobilization has been a total failure and the Bolsheviks openly admit that the end of their power may come within a few weeks or even days. The newspaper's informant says that former Russian officers are being shot by the wholesale and thus far more than 1,700 have been killed.

## FISH TALKS.

BY GEORGE KENNAN

Secretary of the Victoria Fisheries Protective Association  
IV.  
RESULTS ACCOMPLISHED BY AN ENERGETIC BODY OF PROTECTIVE WORKERS.

In the inland waters of both Canada and the United States, between the years 1880 and 1914, large trout and salmon steadily decreased in number for the simple reason that they were not adequately protected. Their spawning grounds, and the number that escaped was not great enough to keep up the stock. This was mainly due to the fact that the people paid little or no attention to the care of them. In the first place, they were allowed to be destroyed by wasteful methods, and in the second place, when our governments, by enacting laws and appointing fishery guardians, tried to save us from the consequences of our own neglect, we—the people—not only disregarded the laws, but acquiesced in permitting fishery guardians to promote the interests of our political parties, instead of using them, as they were intended to be used, for the protection of the trout and salmon in our streams. For this, we doubt, our governments were partly to blame; but we ourselves must bear a large part of the responsibility, because we are supposed to control our governments through the representatives whom we elect.

As a sequence to our neglect, for more guardians were appointed than were necessary, and instances could be cited where in proportion to area there were more than ten times as many employed. As for instance in Maine, where the people of that State, realising the immense value of fish and game protection, insisted upon their guardians doing the work for which they are paid. So that instead of a few men being adequately remunerated for their services, the money was dissipated amongst the many, the guardians devoted their time to other and more lucrative pursuits, and the duties for which mere instances were paid, neglected.

As a result of all these causes, trout and salmon were not adequately protected, and netting and spearing were common in all parts of the island. At first, illegal fishing was practised by a comparatively small number of people; but as year after year passed, it became more general. Some took fish to sell down for winter use; others to sell in the developing markets of the island; and all resorted to netting and spearing (as the easiest and quickest method of taking large fish in large quantities, and which was hardly a river in Cape Breton where trout and salmon were not legally taken by spear or net every year, and in only streams the fishing had been almost completely destroyed).

In 1914, the Victoria Fisheries Protective Association was organized in Baddeck, and in the fall of that year, its officers made an exhaustive survey of the fisheries of the province, and the report was presented to the Civil Service Commission by Ottawa. Guardians, however, will be selected for next year; they will do no political work, and they will devote all of their time to an effective patrol of the streams. Thus, for the first time in more than a generation, the fishery service of Cape Breton Island has been put on a business basis.
