*Hiatus — Accessories: ° \**

EXPLANATORY NOTES.

(1) These letters are not differentiated in Dene. (2) ~ is the nasal n. (3) z is the French j. (4) s is phonetically intermediate between s and s.  
The vowels as in Italian, except æ as the e in Fr. je, te. — The r of Kr, K<sup>r</sup> is hardly perceptible. y, y are very guttural. R is the result of uvular vibrations. Kh, Th = k+h, t+h. Q almost = ty. f is a peculiarly sibilant l. The dot accompanying consonants represents the exploding sound (rendered by < incorporated in the signs). \* is prefixed to proper names, and ° is suffixed to syllables the vowel of which it is necessary to render long. The rest as in Engl.
