

MODERN ELEVATORS

FOR FREIGHT OR PASSENGERS

PLUNGER. —Our plunger elevators embody patented features such as a new main valve which prevents bounding when the car stops, and a new control valve which prevents any accidental movement of the car in the opposite direction when passengers are entering or leaving.

ELECTRIC. —Our electric elevators have patented improvements embodying the good features of the drum and traction type and eliminating their bad ones, and giving greater security and economy of operation. These elevators are worthy of the attention of all interested in office and factory building.
