Concrete Reinforcement

In 3 1/2 ft. Rolled Units.

Page Concrete Reinforcement with a 3 1/2 x 8 mesh, and running wires of 2,200 lb. tensile strength is used on the Harbour Commission Elevator, Montreal, Soulanges Canal, etc. It replaced on the Chambly Dam reconstruction on the Richelieu, a reinforcing that failed, although of large reputation. This is proof of its quality. It really reinforces concrete work under heavy stresses.

Put up in rolls for easy transportation. Running wires of high carbon steel, not bent or kinked, and of full strength. For adaptable and safe reinforcing of concrete, in dam, retaining wall, and bridge work, factory and foundation work, etc.

Particulars, Quotations and Sample on Request.
