

- (c) The accreditor shall appoint a team of qualified experts to assess all of the elements within the scope of accreditation. For assessment of telecommunications equipment, the areas of expertise to be used during the assessment shall include, but are not limited to: electromagnetic compatibility, telecommunications equipment (wire and wireless), and electrical safety.
3. Accreditors may accredit Certification Bodies as capable of performing conformity assessment for the purposes of the importing Party's technical regulations.
- (a) A Designating Authority selected by the exporting Party to act as an accreditation body shall be able to use the requirements and conditions of ISO/IEC Standard 17011 to the maximum extent necessary to accredit certification bodies.
 - (b) The appointed accreditation body shall meet the requirements and conditions of ISO/IEC Standard 17011.
 - (c) The accreditor shall appoint a team of qualified experts to assess all of the elements within the scope of accreditation. For assessment of telecommunications equipment, the areas of expertise to be used during the assessment shall include, but are not limited to: electromagnetic compatibility, telecommunications equipment (wire and wireless), and electrical safety.
