

think that land on McTavish Street will increase in value. It is by no means certain that it will do so, and it is quite possible that it will decrease as has been in the case of all land in the neighborhood of Harvard.

" IV. - NEW BUILDINGS AND EXTENSIONS"

This section contains practically nothing which has not been deal with for years in the report of the Principal and Deans of the various Faculties. Its wording might have been "we agree with the University authorities who have for years constantly advocated,etcetera".

"GYMNASIUM"

The Principal's Report 1922-1923 states " The erection of a Gymnasium has in any event become a definite part of the University's policy and programme".

"DORMITORIES"

Dormitorieshave been advocated for about 50 years by those immediately responsible for the welfare of the students. This was also stressed in the Principal's Report of 1922-1923.

A building for Mining, Metallurgy and Geology - the same report of 1922-1923 states - "the inadequacy of the laboratory and lecture room accommodation for the requifements of the Department directly affects a very large number of students at these courses, and even this inadequate accommodation seriously cramps the Department of Chemistry".

"ADDITION TO THE LIBRARY"

The Librarian's Report for 1925-1926 states - "the outstanding needs of the Library are at the present threefold - more space for books, students and staff".
