

B. J. Kendall & Co.'s New Laboratory.

It is with pleasure that B. J. KENDALL & Co. can now call the attention of their many friends and the general public to their New Laboratory, of which the cut on the last page of the cover of this book is a good representation. A few words of explanation may be of interest. The main building is entirely new, having been erected the past season. It is three stories in height, with basement under the whole building. The location is delightful, being on a rise of ground which gives a commanding view of the whole town, and from the tower the valley of the Missisquoi river can be seen for many miles, and with the Green Mountains in the background, and the valley at your feet, combines to make as rich a landscape view as can be had in this country. The far-famed Mount Mansfield, which is snow-capped nearly three-fourths of the year, can be distinctly seen in the distance with the naked eye. The buildings and the surroundings by many are pronounced the finest of the kind in the country.

The main building is divided into different departments. The basement has two furnaces for heating the whole building, and a large steam engine which furnishes power for the printing presses, elevator, etc.; also, most of the packing is done here.

First floor contains the offices of the Company, drug, manufacturing, bottling, corking and stamping rooms. Second floor consists of two large rooms, one devoted entirely to the advertising department, and the other, a large room used entirely for printing purposes, in which there are several presses in constant operation, supplying the great demand for advertising matter. The third floor is used wholly for storage for bottles, printing paper, etc., etc.

With these increased facilities the Company find that even now they have hardly room enough to meet the great demand made upon them, and at an early day they contemplate making extensive additions.

The great success which has attended the introduction of

KENDALL'S SPAVIN CURE,

In all parts of the United States, has never been equaled, and it is now considered by the best Veterinary Surgeons and most extensive horse owners in the country, to be the greatest discovery in the Veterinary science of the Nineteenth Century. It is giving the very best satisfaction wherever used.

A FEW REASONS WHY!

1st. *It does not blister or cause any sore, which makes it a desirable liniment for man as well as for beast.*

2d. *It is sure in its effect.*

3d. *As a household liniment it has no equal. Its effects on human flesh are marvelous. In cases of rheumatism, any deep seated pain, strain, sprain, or any lameness, it has no equal.*

4th. *It cures spavins, splints, ring-bone, curb, sprains, swellings, and all kinds of lameness.*
