

# THE PLANT WORLD,

An Illustrated Monthly Journal of Popular Botany,

Edited by F. H. KNOWLTON, Ph. D., CHARLES L. POLLARD, A. M.

With the January number *The Plant World* enters upon its third year, nearly double in size and otherwise much improved. The articles are of wide-spread, popular interest and are written in non-technical language. Numbered among our contributors are some of the most eminent of American botanists and amateurs.

A special feature of Volume III will be an 8-page supplement issued with each number, containing a profusely illustrated, popular account of **The Families of Flowering Plants**, which will be the finest American presentation of the results of the modern study of these groups. By its aid the isolated student and amateur may become familiar with the groups of flowering plants of the world. Other features will be articles on early American botanists, plants in their relation to each other and to their surroundings, notes, news, book reviews, etc., etc.

Subscription price, including supplement, one dollar per year. Extra copies of supplement, five cents each.
