

TRIAL PLOTS OF BARLEY.

Fifty-one varieties of barley have been tested in the trial plots during 1899, including twenty-one different sorts of two-rowed barley and thirty of six-rowed. Among the two-rowed sorts there are fourteen hybrid varieties which have been produced at the experimental farms, namely, Sidney, Beaver, Fulton, Leslie, Monck, Nepean, Logan, Dunham, Clifford, Victor, Jarvis, Pacer, Bolton and Harvey. Among the six-rowed sorts there are seventeen of these hybrids, namely, Claude, Pioneer, Royal, Nugent, Trooper, Summit, Yale, Vanguard, Stella, Argyle, Mansfield, Garfield, Brome, Phoenix, Empire, Albert and Surprise.

The barley plots were of the same size as those sown with oats. The quantity of seed used in each case was at the rate of two bushels per acre, and the dates of sowing were as follows: At Ottawa, May 1 and 2; Napanee, May 11; Brandon, May 18 and 19; Indian Head, May 24; and at Agassiz on April 25.

UNIFORM TEST-PLOTS OF TWO-ROWED BARLEY.

NAME OF VARIETY.	Yield per Acre at the several Experimental Farms for Season of 1899.						Number of Days from Sowing to Harvesting.
