Following are the results of the final first year examinations: English and mathematics—W. J. Strong, Essex, Eng.; winner of scholarship in physical science—S. H. Schander, Lion's Head; winner of scholarship in biological science—A. C. Baker, London.

Good plumbing and heating work costs a little more than the cheap work, but the few dollars you spend means ten years added to the life of the work, and four years more to the life of the owner. The work of the Fred Armstrong Co., Limited.

FINDLAY'S SECOND TRIAL.
Faces New Charge of Theft From Ex-Employer.

In the criminal assizes yesterday Douglas Findlay, acquitted last week on similar charges, was charged with theft of \$151.85 from the ex-partnership of McDonald and Maybee, cattle dealers. This charge is the result of a horse deal between William Fawcett and McDonald. A payment of \$1312.85 is placed to Fawcett's account in the ledger, but it is not credited to his cash book. McDonald does not recash the bill, and the money is missing as well. Mr. McDonald was in the habit of leaving signs, signs being around the office, for purposes of paying various bills and for cattle bought or sold on the market. In this way, he alleged, Findlay was able to wrongfully fill out one of these cheques for \$1000 for his own use, the amount was charged against the head of the firm.

Mr. McDonald was examined by Mr. Dewar and created some excitement by remarking as the lawyer questioned him about "debts of honor" that he had seen him at "one of these poker places."

He told Mr. Blackstock that his annual turnover would run between \$200,000 and \$300,000 and that it was an easy thing to overlook some small accounts.

One of the jurors took a hand in cross-examining Findlay.

The World on Toronto Island.
You can have The Daily and Sunday World delivered to your island residence before breakfast, by telephoning your order to Main 252.

Ask for genuine IMPORTED "Wurst-burger Hofbrau" and imported "Original Pilsener" BEERS. At all first-class hotels and cafes. John Krussmann, 30 St. James-street, Montreal, sole agent for Canada.

THE WEATHER

METEOROLOGICAL OFFICE, Toronto, May 11.—(8 p.m.)—Pressure is comparatively high over the Southern States; elsewhere on the continent it is for the most part below the average. A depression of some energy is centred to-night in Wisconsin. Showers have occurred to-day over Manitoba and in the southern portions of Alberta and Saskatchewan, and locally this evening in the lake region.

Minimum and maximum temperatures: Dawson, 26-56; Atlin, 30-44; Victoria, 48-58; Vancouver, 46-58; Edmonton, 42-52; Prince Albert, 44-58; Calgary, 42-50; Regina, 46-56; Winnipeg, 50-58; Port Arthur, 40-56; Parry Sound, 38-58; Toronto, 44-50; Ottawa, 42-50; Montreal, 46-50; Quebec, 38-54; St. John, 44-58; Halifax, 44-60.

PROBABILITIES.
Lower Lakes and Georgian Bay—showers; thunderstorms; partly fair and warm.

Ottawa Valley and Upper St. Lawrence—Showers and local thunderstorms, but partly fair and warm.

Lower St. Lawrence—Fair at first; showers by night, with local thunderstorms.

Gulf—Moderate to fresh winds; fair. Maritime—Moderate to fresh winds; fair; stationary or higher temperature.

Lake Superior—Fresh to strong winds; unsettled and showery.

Manitoba and Saskatchewan—A few local showers, but mostly fair; stationary or little higher temperature.

Alberta—A few local showers, but mostly fair; not much change in temperature.

M. PELLETTIER PRESENTS AN ELABORATE POLICY

Signals Reappearance in Quebec Politics by Radical Suggestions.

MONTREAL, May 11.—(Special.)—The re-appearance of the Hon. L. P. Pelletier in the political arena was marked to-day by that gentleman delivering an address at St. Henedine, Dorchester County, that is destined to cause a shaking up of the political dry bones in the Province of Quebec.

There were 1000 people present, and Mr. Pelletier began by declaring that the incoming government should give free hands to settlers and return to old settlers all they have paid in during the past ten years, thus attracting French-Canadians back from the States. He also wants a farmer's university and the establishment at different points of schools where the sturdy sons of toil may secure a technical education.

"Let us also," he said, "place our butter and cheese on the markets of the world so that they know the old stamp 'Quebec' will be sufficient to induce the consumer to purchase our butter above all other butter."

Twenty-eight years at the bar had convinced him that three-quarters of the crimes, one-half of the civil suits, and seven-eighths of the judicial decisions were due to alcohol; consequently he would have an unrelenting war upon the unlicensed liquor seller.

As for public instruction, which there should not be an illiterate child in the province, he said.

Then the speaker declared that the pulpwood must be manufactured in the province, as is the case in Ontario, thus transferring to this province the 800 mills in the United States which are working up Canadian wood.

"Let us alone," he added, "put a stop to the auction sales at low prices of the national heritage. For years a disgraceful speculation has been going on with the people's timber limits."

A New Legislature.

The most radical feature in Mr. Pelletier's program is his demand for a reform of the legislative council, which he says is now recognized by all.

He wants the government or the day to nominate a certain number of members, and the rest to be divided up amongst the universities, the boards of trade, the clergy, the liberal professions, the trades unions, the agricultural interests, the wayward travellers and merchants' clerks, thus opening the legislative council to eminent men beyond the political class.

He would also like to have a popular branch of which the province would be proud, and not one where the clerical body made that a great many of the members are for sale.

He said that commerce and industry have been the victims of a false principle, and of late the insurance companies especially had been burdened by over-taxation, which no government should be guilty of.

He also said that the prostitution by the government of the crown before the criminal courts for political and personal ends was a disgrace to the province. A state council, whose personnel could only be changed by a joint vote of two chambers, and for grave reasons should be created and composed of persons who have not since five years belonged to the legislature.

Speaking broadly, he said that this institution might be assimilated to what is called in France the conseil municipal, in cooperation with the bench.

Free roads, he said, must be established and toll gates swept from the land.

Square Elections.

There must also be no more electoral surges. When a seat became vacant the election should be held within a delay fixed by the law, and members elected by two consecutive years.

MACKAY IS CONFIDENT OF WINNING ALL BACK

Says Ottawa Valley Ridings Will Go Liberal—Big Rally at Stouffville.

STOUFFVILLE, May 11.—(Special.)—This sea of upturned faces reminds me of the audiences I have addressed all over Ontario," declared Hon. A. G. MacKay, in the auditorium here to-night. The hall was packed full and nearly 700 people were crowded in. Great enthusiasm prevailed, and Mr. MacKay stated that he expected to regain all the Liberal constituencies that were lost three years ago in the Ottawa Valley. One riding lost by 1400 votes would be won back, he said.

Stouffville is a Liberal centre, and the local managers state that J. W. Curry will get a majority of 130 in the town. A special train from Sutton, arriving at 9, brought a contingent from the north with the candidate for that riding.

Mr. MacKay found the statement of the government with regard to the La Rose payment, a humiliating one, and he did not mince words in describing it. When the government issued "this lying document with these lying statements," he knew the facts, and "they knew they were doing mean injustice and a wrong," he said.

Walter Curry declared himself at one with his leader. On the three-fifths clause he joined in the prayer of one of his correspondents that God should overrule events so that ballots cast for God and home should return the man who would best serve the purpose intended.

As for public instruction, which there should not be an illiterate child in the province, he said.

Then the speaker declared that the pulpwood must be manufactured in the province, as is the case in Ontario, thus transferring to this province the 800 mills in the United States which are working up Canadian wood.

"Let us alone," he added, "put a stop to the auction sales at low prices of the national heritage. For years a disgraceful speculation has been going on with the people's timber limits."

That's what you get—a dollar.

You've sold a dollar's worth of goods for cash. You have received this dollar in exchange for something you paid good money for. What becomes of it?

This much is not yours.

These two coins (75 cents) must go to the wholesaler to replace the goods you've sold. They are really not yours.

Nor is this yours.

No, this fifteen cents is not yours either, for it has to be used for rent, light, heat, salaries, insurance and sundry business expenses.

But this is yours—Ten cents.

Has it ever occurred to you that just ten cents of that dollar you have taken in belongs to you? That's net profit. From this you must stand all mistakes, money lost, goods not charged, pay your home expenses, clothes, feed and educate your children, and lay what you can of it by for a rainy day.

Are you sure you get it?

Are you taking enough care of that tenth part of a dollar? Are you sure that you get every cent of it?

We have a method that will make it absolutely certain. We would like to mail you a booklet that tells all about it.

SUSPECTED A GAME

Continued From Page 1.

This line of query, and after a few more questions and similar answers, Col. Anderson was asked about his peccolous statements, that J. F. Fraser, commissioner of lights, had received his appointment in a dishonest manner.

"He was an assistant of mine," answered the witness, "and without concealing the fact I secured an appointment in my name and was given a part of my work, so that it had been maligned ever since. We were both engineers, and it was in violation of the ethics of the profession. What is more, I felt that he was put in his position for a purpose, and not an honorable one at that. I believe he was put there to exploit the use of calcium carbide by the department, I always imagined that the department was putting him there as a necessary waste."

"Was there mutual confidence between you and Mr. Prefontaine?" he was asked, and replied: "I always felt sorry because of the way he had acted in the appointment of the commissioner of lights."
