1,700 The uncertain status of the mining markets was clearly demonstrated to-day, when several of the cheaper is-sues were boosted up a point, with no apparent effort whatever. For the past few seasions the list has been subjected to realizing and displayed a heavy undertone; to-day a 500 complete reversal of this condition was in evidence, and while only small ad-vances were recorded, sentiment was much brighter. The majority of the cheaper stocks made fractional gains, and in the case of Beaver, Little Nip, and Timiskam-ing these extended to hearly a point. The improvement was held thruout the session, and closing prices were around the high for the 'day. There was no activity whatever in the higher-priced securities, and no changes of any account were made. To-day's improvement in market sentiment, while only a tentative one, bears out the idea that stocks are rather hard to scurf around current levels, and the a sufficiency of securi-ties is forthcoming on the advances, the technical position of the hist is good. good.
