Oraloses—Per bag, car lots, \$5 to \$5.25, Potatoes—Per bag, car lots, \$5

Tise of 40 cents.

Until the final hour, bulls had things their own way in the corn market. Persistent commission house buying rushed values upward to new top records for that India, Australia and Argentina would sooner or later have embargoes fact that the exportation of wheat. The grains and the feed grains was not the grains and the feed grains was not the only thing to be considered, made itself ever, in view of advices telling of large additional resales of export oats.

Oats paralleled the action of corn. Provisions averaged higher with grain.

New Shaft to be Rushed.

To develop the high grade lenses, a 500-foot shaft had been started. It is to have three compartments, and measure 8 by 18 feet inside the timbers. Stations, stoping levels, electric tramming levels and orepocke's would be established at intervals, and to rush the work six machines would be employed on sinking alone.

In order to meet the requirements of an enlarged mining program and of the new mills, the directors had decided to develop futher hydro-electric energy. Work on the waterpower had been ordeed to commence at once.

been ordeed to commence at once.

Immediate construction of a mill of 1000 tons daily capacity was announced by the president, Dr. George H. Mackay, at a very large meeting of Associated Goldfields Mining Company, held at the King Edward Hotel yesterday. Over one they wond should be a mill of the control of t yesterday. Over one thousand share-holders were present and a remark-able feeling of unanimity and enthusiasm was displayed.

In his address the president declared

iasm was displayed.

In his address the president declared that development work of the past year at Larder Lake had not oly opened up tremendously large bodies of low grade ore suscepible of milling at a good profit, but that two wide lenses of high grade ore averaging, thruout their length, depth and width. \$11.15 a ton, had been revealed and partially developed. These lenses are known to be 2000 feet long, from 50 to 150 feet wide, and have been proven to exist at least 500 feet down, with every indication at that depth of continuing with possibly higher values.

The president pointed out that selective mining of the high grade would not interfere with the mining and milling of the low grade ore on the large scale originally planned.

Second Largest Mill in North

Ground has already been broken for the 1000-ton mill, which will have in itself a capacity only exceeded by the output of one other Ontario gold mine. Actual construction begins in a few days. A decision as to whether an additional and adjoining 1000-ton mill will be started in the near future depends on a study being made as to

ditional and adjoining 1000-ton mill will be started in the near future depends on a study being made as to how far early delivery. of material and equipment will be affected by transportation facilities.

The first unit is but a step toward the ultimate and original aim of a service.

the ultimate and original aim of a serthe ultimate and original aim or a series of mills aggregating 10,000 tons a day. The building of a first unit and the discovery of high grade ore enable the company to reach the stage of production and return on investment much sooner than was anticipated

much sooner than was anticipated.

Railway Branch Coming

The question of railway facilities was brought up when the consulting was prought up when the consulting engineer, Mr. A. J. Moore, reported that to bring the properties to their fullest development and the large production of gold of which they were capable, a branch line from the T. and N. O. Railway would be necessary. The president said that this question was under consideration.

Over a Million in Treasury
A financial position unique in the
annals of the mining history of Canannals of the mining history of Canada was disclosed by the financial report. At March 31 the company had on hand liquid assets of \$1,100,000, composed of three quarters of a million dollars in the bank, \$30,000 in Victory bonds, and \$250,000 in notes shares still remained in the treasury receivable. A year ago the company had on hand \$160,000, and since that time approximately \$260,000 has been expended in development and on

Remarking about the strong mone-tary position of Associated Goldfields, the president said that he ascribed it the president said that he ascribed it to the fact that share rolders realized that every cent subscribed for stock went into the company. Nothing but treasury stock had been sold, and there had been no fancy outlay on promotion, advertising or commis-sions.

SUGAR ADVANCES IN MONTREAL MARKET fits from the treatment of a much larger tonnage of lower grade material. Therefore returns will result earlier than anticipated. First 1000 Tons Milling Unit. G. 1

Montreal, April 16.—Trading in listed stocks on the Montreal Stock Exchange today amounted to 11,880 shares, as compared with 10,358 the preceding day, and 11,565 for the same day a year ago. Atlantic Sugar took first place among the active stocks, displacing Brompton, which came second. Sugar opened at 88, and advanced to 90½, with the close at 89½, showing a net gain of 2% points. The paper stock opened at 88½ and sold up to 90½, with the close at 88½ and sold up to 90½, with the close at 88½, showing a net gain of 1% points for the day.

Outside of these two, the stock most in which there was no trading in the afternoon, closing bid at 107½, finding no offers under 107%, followed by an advance to 108, after which 50 shares sold down to 107%, a net gain of 2% points for the day.
