Elgin, Kane Co., Ill., March 10th. 1851.

Mr. J. M. Henry.—Sir,—My nephew, son of Rev. I. Chase of Boston, who had been doing business in Chicago, was taken sick there in October, having taken a sudden cold which settled in his lungs, which were naturally weak. He employed Dr. Fitch, a physician of great celebrity in lung complaints, until he (Dr. F.) said he could do no more. His treatment proved an entire failure, and he advised Mr. Chase to go to his friends, as he could do nothing for him. He came to my house, and we all supposed he must soon die. We called in our family physician, but he could do him no good. As a last resort we began to give him *Downs' Elixir*. In a few weeks he began to mend, and to our great surprise, in ten weeks after he arrived, by using nineteen bottles of the Elixir, he was able to start, in good spirits, for Texas, to spend the winter; and the prospect now is that a permanent cure has been effected. His case being known here, the demand for the Elixir is very great.

Respectfully

JOHN MORSE.
