

SILICA BRICK WORKS AT PARSON'S BRIDGE

SILICA BRICK AND LIME CO.

LIMITED.

SILICA BRICKS are fast becoming known all over the Coast. Amongst other orders, the following have been booked, and the output of the plant has been contracted ahead for nearly six months.

David Spencer Building, Vancouver.....1,000,000
St. Joseph's Hospital Addition, Victoria.....600,000
Brackman & Ker Building, Victoria.....80,000

The first named order will require 80 cars with a capacity of 12,500 bricks each to transport same to Vancouver.

In and around the works, there are nearly 20 men employed, and, within twelve months, when the plant will be doubled and a large Hydrated Lime Plant in operation, there will be nearly, if not quite, double the number employed.

This is the first plant of its kind erected in British Columbia, and when the Hydrated Lime Plant is installed, it will be the only one of its kind in Western Canada.

Sand Lime Bricks were introduced into Germany in 1882, by Dr. Michaelis, and now there are in operation over 200 plants, and over 150 in the United States.

One of the Directors has recently examined the bricks made in a number of the eastern factories, and reports that the bricks being turned out here are the best he has seen in his travels.

With the foregoing figures before us, who can say that Victoria is behind the times.
