

## A Little "Tank" ---for Farm Work

The Cleveland Tractor is built on the same principle as the wonderful European battle tanks.

*It travels on its own tracks, laying them down and picking them up as it goes along.*

This efficient type of construction makes the Cleveland specially valuable to farmers, as it enables them to work practically anywhere—over almost any kind of farm land.

They are being operated over gullies, ruts and ditches, through soft soil, wet clay, sand and gumbo—without sinking or floundering. They do not pack the soil.

They are working under and among small trees, close up to fence corners, on hillsides and over rough ground with much better results than can be obtained with horses or with any other type of tractor.

And they are working much faster.

Thousands of Cleveland Tractors are helping to increase the production of food demanded by war conditions.

The Cleveland, pulling two 14 inch bottoms—which it will do under average conditions—plows  $3\frac{1}{2}$  miles an hour—eight to ten acres a day. This is equal to the work of three men and three good three-horse teams.

The Cleveland steers by the power of its own

engine; it requires but slight effort on the part of the driver. Only one man is required to operate it. 12 horsepower is developed at the drawbar and 20 horsepower at the pulley. It is a constant source of tractive and stationary power for twelve months in the year.

It plows, harrows, plants, reaps, cuts ensilage, runs saws and pumps, drags logs, pulls road machinery, hauls manure spreaders and does practically all the work formerly done with horses or stationary engines.

*The Cleveland Tractor produces food but consumes none of it. It conserves man power, horse power, time, energy and effort—and produces greater returns.*

The Cleveland Tractor was designed by Rollin H. White, the well-known engineer. It is manufactured under his supervision. Gears and tracks are protected from dust and dirt. Materials throughout are of the best. The whole machine weighs only about 3200 pounds. It can be housed in less space than is needed for a horse.

Take advantage of present produce prices. Raise more food now. Help the nation and incidentally make more money yourself by using one or more Cleveland Tractors.
