Shutting out of German Imports has had Only Minor Bearing in Decrease in Total

COTTON FABRICS DECREASE

Seven Months Ending With February Shows Greater Activity Among Knitting Mills and Other Con-sumers of Imported Cotton Yarns.

By E. S. BATES.

The condition of the dry goods market in Canada has been far from satisfactory during the past eigh- Exchange quotations to further recover, the margin teen months or two years, there being a slackening between the amount of the loans still outstanding on demand from all over the country. This condition had followed a period of several years of heavy The period of nearly nine months which has elapsed limited for the time being. The interval, however, has so improved the situation and outlook that there is limited for the time being. The interval, nowever, has so improved the situation and outlook that there is acted as a regulator. Stocks have been reduced to a no longer sing cause for misgiving, very satisfactory level, and the trade anticipates con-Obviously the intrinsic merits of bank shares are very satisfactory level, and the trade anticipates con- contously the intrinsic ments of pank snares are siderable activity in the market in the near future; improved by the recent turn of events, and the very siderable activity in the market in the near luture, improved by the recent turn of events, and the very perhaps, not before the crop is assured, or there is large number of persons who will such issues among more definite knowledge as to when the war will end, their investments will be glad to know that the more definite knowledge as to when the war will end. their investments will be glad to know that the As a considerable portion of the textles consumed in present trend of events of the Stock Exchange is fa-Canada is imported, statistics of these imports reflect visuable to these upon when Throgmorton Street re-the condition of the market to no small extent. What occurred in this regard since the outbreak of war ance. will therefore be interesting.

During the period August 1st, 1914, to February MAXWELL MOTOR COMPANY PLACES 25th 1915, the latest for which statistics are avail-able, there was a big decrease in the imports of all well Motor Company by the action of the directors ponding period of 1913-14. Of course, the imports to-day is placed on a regular 7 per cent basis and from Germany since August 1st last has been nil and as Canada consumes a comparatively heavy amount of German textiles each year, one naturally expects The current year has been an exceptionally pre-

minor bearing on the decrease in total imports that an increase of the country has had only a minor bearing on the decrease in total imports that has taken place not only in our trade with Germany. Belgium and France, but also in that with Great Britain and the United States in the case of textile fabrics.

Discussing the monetary situation, The Statist in ts current issue says:

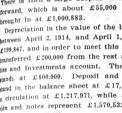

"It is reasonable to expect that if the war lasts for any length of time we shall see high rates of both interest and discount in New York. The rise up to the present has not been excessive, and t will probably be kept within bounds if the belief prevails that the war will come to an end, say, in spun out there will be more extensions of all manyfactures, and, therefore, more preparation for suption of the belligerents. No man, then, can form anything like a confident opinion as to the probably duration of the rise in the United States mene market unless he has a reasoned and apparent all events, well-founded opinion as to the probatime the war will go on.

"Then, too, the actual movement of rates in New York will be influenced to some extent by events of the war, whether it be long or short. For example, if large land forces co-operate with Fleets attacking the Dardanelles, and if the land forces are speedily able to silence and capture the differen forts, there will be little difficulty in clearing away nines, and the advance of the Fleets will be com paratively rapid to Constantineple itself. On ther hand, if the defence of Constantinople is pretracted the duration of the war will promise prolonged likewise, and the tendency will be for rate to rise in the United States. Whereas if the Dar lanelles are thrown open quickly Russia will be able o export the grain which has been shut up ever sinenarvest-time; and, therefore, one great cause of increased activity of business in the United States will be immensely lessened.

"On the other hand, it is to be recollected that the great access of wealth brought to the United State by the war is likely to stimulate enterprise in the country in a new direction. Hitherto the United States has been a debtor country. For long resources of the great Republic were so vust and much in need of development that American capivas never sufficient for the needs of America, aconsequently, America was nearly always a borrow Now the great lending countries of Europe are en gaged in a war so colossal that to finance it taxe heir whole ability. Countries, therefore, that used o look to London and Paris for financial accommdation are compelled to look elsewhere at present. and it is quite possible, therefore, that a form of buness may grow up which may tend to con ew position of the United States. The modifie banking system ought to help in such a developme and whether America becomes a great world lender

or whether for a considerable time yet she content herself with being a lender to the less developed part of her own territory, the probability seems to be the investment will take a larger part in the busine of the great Republic than it has hitherto done. "Open-market rates of discount are practically The new departure of the Treasury in hanged. offering to sell Treasury bills over the counter has me with quite as much support as could be expected. notwithstanding the money thereby taken off market short loans in Lombard Street have been tainable by the discount brokers frequently at be per cent. for weekly fixtures, although the jud appreciable influence in reducing the floating sup-
