

Sask-Alta Steel Range

Will Hold 325 lbs. Weight

Oven-door of an ordinary range has weak supports. You are afraid to lean on the door or place a heavy roast on it.

No danger of Sask-Alta oven-door ever breaking down. It has tremendously strong supports.

Under actual test Sask-Alta oven-door has held 325 lbs.—which is over ten times the weight it requires to sustain in ordinary use.

Sask-Alta is made extra strong everywhere. It is pounds heavier than ordinary steel ranges. It's built to last, is Sask-Alta. It's the range for you. 31

GET READY FOR HAY BALING

THE demand of the market is for baled hay. There are the best of reasons why you should bale the hay you have to sell.

There's a larger demand for it. It brings a better price. It is easier to handle.

And you should bale it yourself rather than hire it done because the money you would pay the contract baler eats a big hole in your profits.

You have the time to do your own baling. You have idle horses in the fall and early winter to furnish the power. And you have enough help, or nearly enough help, on the farm to operate the press. All you need is a good reliable hay press.

I. H. C. PULL-POWER PRESSES DO GOOD WORK AND FAST WORK

Buy one of the strong steel and iron I. H. C. presses this year, and if you have any considerable amount of hay to bale, it will save you its cost the first season. And you will have a reliable press for many seasons to come.

I. H. C. presses make you independent of the contract baler. They are specially valuable to the average farmer and hay raiser because they are operated with small forces, at no expense for power, and the work can be done at times when there is little else for either man or horses to do. These presses will bale your hay, straw or anything else you have to bale into solid, compact and uniform bales. The one-horse press, an ideal baler for small hay raisers, turns out 14x18-inch bales. Under average conditions, it will bale at the rate of 6 to 8 tons a day. The two-horse press has bale chambers 14 by 18, 16 by 18 and 17 by 22 inches in size, and bales 8 to 15 tons a day—a profitable machine for joint ownership among neighboring farmers or doing contract baling.

I. H. C. presses are not horse killers, are convenient to operate and there is no pounding or uneven draft. Both are full circle presses, and do not worry the horses with constant stopping, backing and starting.

Call on the International local agent and see the presses, or write to the nearest branch house for catalogue and particulars.

The "NEVER FAIL" Oil and Gasoline Cans

CALVANIZED IRON

ADVANTAGES OF THE "NEVER-FAIL" CAN

You have no oil valves or pump to get out of order, no faucet to leak and drip. You do not have that disagreeable odor of oil and gasoline in your rooms when using this Can.

You need not be afraid of an explosion if you use the "Never Fail" Can.

You do not have oil all over your hands, lamp and floor when using a "Never Fail."

Your oil and gasoline bills will be one-third less when using one of these cans, as they are air-tight, allowing no evaporation.

It is the only Can wherein gasoline may be kept with any degree of safety.

Ask your dealer for a "Never Fail." Take it home and use it, give it a fair trial; then, if not satisfied, take it back and demand your money. Can you ask any more than this? Will you not give it a trial on these terms?

Will draw over a gallon a minute.

Will take all the oil out of the can.

Will run the oil from lamp back into can.

Your money back if not satisfied.

If your dealer can't supply you, write us.
