THINK back to the last harvest time. Did you get all the profit from your acres that should have been yours? Or through delays, caused by tinkering with broken-down or inefficient machines, did you lose valuable time? Did you get all the grain-tangled or down-or did your machine leave a part of your profit in every field? Ask yourself today. Did I get the best results possible from my harvesting machines last year, and, if so, are they in condition to give me the same service this year? If not-Now is the time to choose the machines that will get all the crop this year in the shortest time—with the least effort on your part. That means

the Deering. They are machines that will give you the very best service. They are built to meet the conditions encountered on Canadian farms.

The Deering binder is a model of convenience for operating. It is a strong machine. You will not be troubled with breakages. It has light draft and has such a wide range of adjustment that it is adapted for all conditions of grain and fields.

You will be sure of satisfaction with a Deering. It is a proved machine. In addition to binders, the Deering line comprises various other machines in harvesting and having machine lines, seeding and tillage implements. The Deering local dealer handles I H C gasoline engines, cream separators, manure spreaders, wagons, hay presses and motor vehicles

Investigate the Deering line. Learn what Deering machines will do for you. Call on local dealer for catalogue and particulars or write to nearest branch house.
