Beef Shavers

More than a Slice a Second is the
"Enterprise" Way

The Enterprise beef slicer is made in two styles—No. 23 is the smoked beef shaver with self-sharpening device. The knife is suspended pendulum-like, and each stroke cuts a slice cleanly and quickly. It is regulated automatically to cut from tissue thickness to an eighth of an inch.

Enterprise Rotary Smoked Beef Shaver with Self-Sharpening Device achieves the very highest point in the manufacture of this type of machine. The feed is easily regulated and cannot shift while in use. Slices are absolutely uniform always, the machine being capable of cutting from tissue thickness to a quarter of an inch. The sliced beef falls into a drawer which holds about two pounds.

Either machine will give you entire satisfaction for years and will rapidly earn its cost in increased sales and labor saving. All parts are interchangeable.

They cut without waste.
