**Electric Restorer for Men**  
Phosphonal restores every nerve in the body to its proper tension; restores vision and vitality. Premature decay and all neural weakness revived at once. Phosphonal will make you a new man. Price \$2 a box, or two for \$3. Mailed to any address. The Beehive Drug Co., St. Catharines, Ont.

### Ladies Must Have Beautiful Hair to be Attractive

# SALVIA

The Daintily Perfumed Hair Tonic

Creates a Magnificent Head of Fluffy, Luxuriant Hair—Men and Women of Culture use Salvia, the latest Paris Hair Dressing—it will make your hair grow or your money back

SALVIA—the Pride of Paris Hair Dressing and Tonic—at once goes to the roots of the hair and turns harsh characterless hair into beautiful wavy hair, full of character and life—hair that changes the whole appearance.

SALVIA destroys the dandruff and will positively make hair grow. SALVIA is not a sticky sulphur preparation, but a pleasant non-sticky and daintily perfumed. Ladies of taste and refinement wouldn't think of using any other. All actresses in every country now use SALVIA continually.

We claim and absolutely guarantee that SALVIA will create a new growth of hair. If your hair is getting thin, commence using SALVIA at once. It will soon stop your hair from falling out and make the hair grow.

SALVIA is compounded by expert chemists, who have made the hair and its diseases a life-long study.

If your druggists don't happen to have SALVIA in stock, insist on his getting it for you; don't allow him to sell you "something just as good" because there isn't anything "just as good" as SALVIA. All wholesale druggists in Canada, sell SALVIA; and your druggist, if he is up to date, keeps it. Refuse substitutes.

A large generous bottle sells for 50 cents. Sold at Clarks Drug Store.

### Good Season For Black Foxes

Managing Director of the Tuplin Farm is in the City

C. L. Grant of Prince Edward Island, Managing Director of the Tuplin Black Fox Corporation with Head office at Halifax and ranch at New Anson P. E. I., was in the City yesterday and in the course of an interview with The Morning Chronicle gave many exceedingly interesting accounts of the black fox industry in that Province.

Mr Grant's trip to the City was for the purpose of reporting to the head office of the Company the prospects for the future. He said that the present season had been a good breeding one. Mr Tuplin had reported seven litters to date from eleven pens, and the prospects were excellent that there would be a litter in every pen.

In the past the average to a litter has been 3½. Nine pairs had last year 33 pups, and that season was not considered good for breeding. One of the Tuplin females which had four last year had six this year. The black fox industry generally has had an excellent season.

Speaking directly of the Tuplin Company, Mr Grant said there had been sales made of young foxes in Boston, New York and all over Canada to Vancouver, with inquiries, from Russia and Japan.

"Some of our stock was sold early at the market price of the time. Yesterday we sold three additional pairs at much higher prices. In this connection I may say that sales have been made in Russia and Japan, which goes to prove the world wide interest which the industry in Prince Edward Island has created. Another fact of this interest is that taken by the Press, both New York and Montreal papers and magazines have published special articles regarding the industry's development."

Four-fifths of the silver black in captivity are on Prince Edward Island, the total number being about 300. The other one fifth are principally held in New Brunswick and Quebec. In their native haunts they are now confined to Alaska and the northern parts of Canada.

Mr Grant was very enthusiastic about the prospects for the coming year. "So far as we can judge," he said, "this year's increase is over sold, the people inquiring for them now will have to wait until 1914."

### From Parrsboro Leader

Schr. Emma T. Story has been repairing and refitting at this port and is loading a cargo of beach gravel for Horton Landing to be used in the new C. N. R. bridge.

Mr. and Mrs. Frank Miller of Two Islands, expect to go to Wolfville to spend the summer months. They were honored with calls from a number of their friends last week.

Schr. Harry W. Lewis, Dexter, arrived at Parrsboro Roads on Sunday from New York for Wolfville with a cargo of hard coal. She will remain at the Roads for a few days till the tides will permit her to reach her berth.

S. S. Prince Albert arrived on Sunday from Yarmouth and commences her Summer's work between Parrsboro—Kingsport—Wolfville today. She has been painted and the machinery overhauled and is in first class condition.

### Returns From His Duties in Great Britain

Mr. John N. Chute, the representative in Great Britain of the United Fruit Companies of Nova Scotia, Limited, arrived at his Berwick home last Saturday accompanied by Mrs. Chute.

The officials of the company express themselves as highly satisfied with the work done by Mr. Chute. In their reports they have pointed out how savings effected by their representative in the disposal of apples have paid his salary and ex-

penses several times over. They further point out that not alone in such savings has Mr. Chute's work proven valuable, for he has collected information and obtained business connections which will prove highly advantageous to the co-operatives in future years.

In an interview on Monday Mr. Chute said that from now on Nova Scotia fruit growers must prepare themselves to meet the keenest competition in the apple markets of Europe. The strongest competition during the past season came from Oregon apples. The western fruit reached the European market packed attractively. The fruit itself was excellent and the quality standard kept high. With the Oregon apples no undesirable varieties were sent, the trade chiefly centering on Oregon Newtons. The result of such perfection, meant, said Mr. Chute, easy marketing and the highest prices, and a name was being made for the fruit that was a great advertisement in itself.

"We can grow as good apples," declared Mr. Chute, "as they do in Oregon, but we have not yet adopted the methods of packing used by the westerners and our growers have not realized the necessity of paying more attention to quality. We have a big fight on our hands if we are to continue successful apple growing in Nova Scotia and the sooner we realize this and act accordingly the better it will be for all of us."

Mr. Chute gave many instances of the value of co-operation but claims there is much to be done in order to make sure for the grower a greater amount of the price paid by the consumer for the product. He points out many savings that could be made if the growers had better market arrangements on the other side and would keep hold of the apples until they passed into the hands of the retailers.

Another point on which our growers are weak is advertising. Mr. Chute says the California Fruit Grower's Association spent \$150,000 in advertising in the British markets last season and considered the money profitably spent. There should be, in the opinion of Mr. Chute, a systematic advertising campaign for the Nova Scotia product, pointing out not only the excellencies of our apples but giving various ways in which the fruit can be used. But above all the product must be up to the advertising.—Register

### A GOOD MEDICINE FOR THE SPRING

Do Not Use Harsh Purgatives—A Tonic is All You Need

Not exactly sick—but not feeling quite well. That is the way most people feel in the spring. Easily tired, appetite fickle, sometimes headaches, and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuralgia. Any of these indicate that the blood is out of order—that the indoor life of winter has left its mark upon you and may easily develop into more serious trouble.

Do not dose yourself with purgatives, as so many people do, in the hope that you can put your blood right. Purgatives gallop through the system and weaken instead of giving strength. Any doctor will tell you this is true. What you need in spring is a tonic that will make new blood and build up the nerves. Dr. Williams' Pink Pills is the only medicine that can do this speedily, safely and surely. Every dose of this medicine makes new blood which clears the skin, strengthens the appetite and makes tired, depressed men, women and children bright, active and strong. Mrs. Maude Bagg, Lemberg, Sask., says: "I can unhesitatingly recommend Dr. Williams' Pink Pills as a blood builder and tonic. I was very much run down when I began using the Pills, and a few boxes fully restored my health."

Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.
