FRIDAY, MAY 3, 1907.

GREAT PROFITS IN FRUIT.

A newspaper man recently paid visit to the Niagara Fruit districts, to gather information upon the prospeets for the coming fruit harvest and the reports he sent back to his paper were very surprising, and full of valuable information. He found that the fruit growing industry is farm pursuits. The crops this year will be an abundant one, and the fruit growers are enlarging their areas, and many more men are entering fruit growing propositions with the utmost profit and satisfaction. Spraying is carried on very extensively, with very favorable results, In St. Catharines along over 600 bags of sulphur have been sold this year. This represents about 5,000 barrels of spraying mixture. At \$2 per barrel, this means an outlay of \$10,000 on spraying alone in that district, This is also a very low estimate of the amount being done. Carry this over all the fruit districts of Niagara and a vast sum of expenses is piling up against the encoming fruit crop. This money must be returned some way and the state of the amount being developments. one of the best paying features of farm pursuits. The crop this year must be returned some way to the fruit man. He must get it back in better prices or in better yields. The Why Insurance Companies Discrimi-Government's aid in granting some money for the spraying outfits is much appreciated, and while it came

All persons, they say, when the as one would suppose, where so much small tedious work is required.

Higher wages are being paid now and there is a tendency to hire men by the year, and many old houses are being rebill to accommodate two families, while small cottages are going up. The fruitmen are prosperous, and along the leading road through Grimsby, at the mountain's foot, some of the handsomest of residences accommodate the owners and adorn the valley, where grow the choice fruits, so celebrated over the world.

Big incomes are made on the fruit farms. Nearly every man who works gets good returns and the evidence of prosperity is reflected in the substantial homes and well equipped farms with every modern convenience.

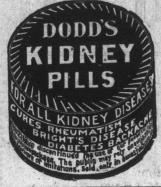

On a 12 1-2 acre farm owned by E. D. Smith and planted to peaches, full returns from last year's crop have shown a net profit of \$2,000 after paying for boxes, shipping and caring. And then the trees were not mature and the crop only a medium one. What others make off little

mature and the crop only a medium refund the money unless it does all one. What others make off little that is claimed for it. patches of strawberries, grapes, raspberries, plums or pears, would put many a 100 acre grain farm to the tall timbers of embarrassment.

There the young man has the great chance of his life. Instead of going west and homesteading for years, in loneliness, discomfort and molasses, the youth can buy a few acres there, stay with the job and in as few years become as opulent as his neighbor. The old men have attained their homes after years of labor, and perhaps they are to blame for the feverish haste the young men large banners, picturing them as

Niagara, and it is just as well'

mation, it would certainly seem that many of these young men, who have succumbed to the desire to go west, have made a mistake. Far away fields are certainly green, but it will be a long time before anyone will find another farming district, where the fields are more green and fertile than they are right here in

HARD UP, SELLS WIFE.

WOMEN PAY MORE

nate Against The Gentle Sex.

Medical examiners of insurance companies say that the reason a womuch appreciated, and while it came late many are taking advantage of it. Even in the face of these heavy expenditures, the people of this district are making large sums of money out of fruit.

The labor question is not as acute as one would suppose; where so much small tedious work is required.

Medical examinars of insurance companies say that the reason a woman pays more for the privilege of insurance than a man, is from the fact that women more readily fall victims to indigestion and stomach troubles and the fatal allments that spring from these Aluses.

All persons, they say, who have a weakened digestive system and suffer from sick headolah, dizzy spells, distress after eating, specks before the

SOCIALISTS PARADE.

Sympathize With Men Under Indict-New York, May 2:- With the "Marand perhaps they are to blame for the feverish haste the young men display to become like them. Any youth who will assume the difficulties of the west amid the vines and trees of Niagara, will find his lot a pleasant one, and his burden light. This is an industry, the advantages of which have to a great extent been overlooked in Kent. We have in this county a soil which is every bit as fertile as the soil around

ery bit as fertile as the soil around GREAT DISTRESS IN HER THROAT

dustry. It is surprising that more farmers of this progressive county have not realized the great profits which are to be derived from this branch of agriculture.

Of late years especially, there has been a rush for the Northwest and the craze has strongly entered the lives of many Kent residents. The result has been that many young men have left good farms in Kent to seek their fortunes in the Great West. In view of the above information, it would certainly seem that

IT CERTAINLY DOES.

A college education, declared the anthusiastic mother, brings out all that there is good in a boy.

Oh, yes, retorted William's father, and in Bill's case I wish a little of it could have stayed in.

Change In United States Subscription Rates

The Planet, in common with all other newspapers of Canada, has been notified by the Postoffice department at Ottawa that on and after May 8th next; the rate of postage on vapers entering the United States will. 'e. changed from one-half price of The Daily Planet sent to the cent for every four cunces or fraction of four ounces.

This means that single papers entering the United States will each require one-cent postage, that parcels of papers sent to one office will be four cents a pound.

In view of this, after May 8th the price of The Planet sent to the United States will be \$5.00 per annum.

There is a reduction in the actual price of the paper of over \$1, as the postage the publishers will be 'bliged to pay will be \$3.12 a year on each subscription. The Weekly Planet, will be \$1.50 per annum, atrictly in advance.
