

A People's Government!

For the Fisherman, Lumberman, Mechanic, Labouring Man, and the Man Who Earns His Bread by the Sweat of His Brow.

Editor The Evening Telegram.

Dear Sir.—The readers of the People's Paper here cannot but be delighted to read in your columns of the triumphant march of the party of Progress and Stability led by our incorruptible and well tried leader, Sir Robert Bond. Particularly is this so in the case of the District of Placentia and St. Mary's. As a voter in that District the writer has read and observed everything referring to the canvass by both sides and has no hesitation in predicting a great victory for the candidates of honest Government, Messrs. Sullivan, Carty and Summers, and this is as it should be for who more worthy to represent the District than her manly son and warm friend—Michael S. Sullivan and his two colleagues. Mr. Sullivan's name is known and respected from one end of the District to the other.

As the Friend of the Workingman. Grand Falls bears ample testimony to this, for has he not ever endeavoured to defend each and every applicant for employment that approached him when in office here. And the fathers and brothers, friends and others of those befriended will not fail to repay on polling day to the best of their ability, the debt of gratitude. For twenty-eight years the writer has been acquainted with George Carty and can bear witness to his manly and upright character. In him Placentia will have a representative who will act a straightforward part and would scorn to do or say an untruthful or mean word or action. Mr. Summers is well known as a lawyer of ability and experienced journalist. With these in the House, Placentia will again be represented by

Men Worthy of the Days of Yore, of the days when such men as Donnelly, McGrath, Shea and Emerson guarded her interests and did honour to their constituents. Of the policy of the Opposition I need not

say much. But I will say it is high time to put a Government of the people in power. I mean a Government of the real people—the working people—the fisherman, the lumberman, the mechanic, the man who earns his bread and supports his family and his country by the sweat of his brow. We have such a party before the country at the present time and every thing points to a glorious victory for that party on the 29th. The fact that there are thousands of square miles of splendid timber lands along some of our best rivers lying idle because of the greed and want of energy of some of the supporters of the present Government, should be ample reason why the people should rise in their might and alter this state of affairs.

With the Example of this Town Before Us

and the hundreds of thousands of dollars distributed among the people, we should cry shame at ourselves for permitting Morrison and the other timber sharks to tie up the heritage left by our forefathers to ourselves and our children. In view of his vast experience then as Asst. Supt. here, Mr. Sullivan is eminently qualified to properly advise and

Assist in the Proper Development of the Internal Wealth Lying Dormant

in our timber and minerals. As manager of the labour bureau, he will be in a position to better assist the workmen than ever before. All these should induce any waverers not to hesitate on polling day to cast their votes for the party of Clean Government, the party of the people, the party led by Bond and Coaker and by marking their ballots for Sullivan, Carty and Summers make assurance doubly sure that

BOND CAN'T LOSE!

Yours truly,
STROUTER.
Grand Falls, Oct. 20th, 1913.

A Rainy Day.

By RUTH CAMERON.

manly for lack of an occasional rainy day.

Is there any more restful and tranquillizing experience after a long stretch of uninterrupted sunshine than to awake in the morning to the music of the steady drip of rain outside the window and the gratefully subdued, cheerfully melancholy light of a rainy morning?

In the first place, there is such a luxurious sense of indefinite duration about a rainy day. It is difficult to realize that a rainy day can be only twenty-four hours long.

It seems possible in prospect to do so many things on a rainy day. That well recommended volume which has lain so long on the library table awaiting a leisure hour—this very day its leaves shall be cut. And of course this is the ideal opportunity to finish that centrepiece. Then, what better chance could one have to banish that abominably fat packet of letters in the "Unanswered" pigeon-hole. And so one goes on and on planning quite enough to fill a day of at least forty-eight working hours.

Then there is the rich sense of seclusion which a rainy day begets. For

my part, I somehow like this to be as pronounced as possible. Even the visits of the storeman and the milkman seem unwarrantable intrusions, and although I thoroughly enjoy a friend once she is domiciled, I must say I rather resent her first appearance as a kind of cheapening of my precious seclusion.

Of course, I am not unaware of the bolder joy of getting suitably garbed and sallying defiantly forth in the rain to smell the growing things and catch their spirit, and get one's hair wet and lungs well washed, but this is a pleasure that I am more apt to appreciate the second or third day of a rainy spell after I have had my fill of the delights of seclusion.

The difference in favor between the rainy day and the snowy day is an interesting psychological distinction. There is begotten of both a sense of seclusion, but on the snowy day it is a jolly, hilarious seclusion of the whole family—"all friends shut out, the housemates sit around the radiant fireplace enclosed in a tumultuous privacy of storm." Whereas, on the rainy day one's retirement is more individual and has more of a subdued and dreamy flavor. On the snowy day we make molasses candy, or play games with the young folks, or pop corn. On the rainy day we rummage around in the garret, or sort out old letters, or dream over a book, preferably an old friend with whom we have commingled many times before. I know a girl who reads "Little Women" every rainy day and my own "Cranford" is indissolubly associated with the sound and smell of a rainy afternoon.

Ruth Cameron

The Notorious Piccott.

Editor Evening Telegram.

Dear Sir.—My interest has always been given the People's Party, as you know, and I was a worker for them since the present campaign opened. I was in the procession yesterday, although I must say I did not like the idea of running away, and not listening to what our opponents had to say at the Court House. But what I wish to refer to is the blackguardly expression of A. W. Piccott, at the K. E. B. Armoury, when told by a hater what the Liberal candidates said about him. In the presence of some school boys he used vile remarks which I dare not put in print, but which I give you for your own information, and you

may use it as you think fit. I am now left the party. I would not, Mr. Editor, vote for a man who would use such language before little children, and I call upon all other voters who respect morality, to consider as Piccott the man to "deserve" your votes?

Yours sincerely,
RIGHT ABOUT TURN.
Mr. Grace, Oct. 21, 1913.

Cold in the Chest

RUB WELL WITH ZAM-BUK!

For bad colds on the chest, rub the chest and between the shoulders well with Zam-Buk at night.

If you suffer from catarrh or cold in the head, just insert a little Zam-Buk at the base of the nostril, and as the balm becomes warm, inhale the healing essences which vaporize.

Sores in the nostril, which are sometimes set up by catarrh, will yield to Zam-Buk treatment.

Mrs. N. S. Babcock, of Matawastchan, Ont., says: "For a long time I had a very disagreeable sore on the inside of the nostrils, which gave me great pain and caused much annoyance. I feared it would turn to cancer, and all I tried proved unavailing. I was ordered to try Zam-Buk, and I am glad to say that the sore that defied all other remedies was overcome by one box of Zam-Buk and is now quite healed."

Zam-Buk will also be found a sure cure for cold sores, chapped hands, poison, piles, cuts, and skin injuries, peison piles, cuts, and skin injuries generally. All druggists and stores, 50c. box, or Zam-Buk Co., St. John's, Nfld. Try Zam-Buk Soap, 25c. tablet!

Blunder and Incapacity.

The Most Iniquitous Deal on Record. Public Confidence Forfeited.

Sir E. P. Morris's record has been marked with blunder and incapacity since his connection with our local politics. We say this without prejudice. It will take a long time for this Colony to emerge from the wreck and ruin thrown upon it by the "iniquitous railway deal"—the most outrageous deal that ever cursed any British territory, when Sir E. P. Morris with others signed away a property that cost thirteen million dollars for one-thirtieth of its value. That was opening the flood gates of wrongdoing and bringing upon the Colony almost hopeless ruin.

Any Man Who Would do a Thing Like This, no Matter How Great the Inducement, Never Again Ought to be Trusted with Public Confidence.

VOTERS think for one moment, would you build a vessel to cost twenty-six hundred dollars and then give her away for two hundred dollars? Would you build a house for \$1300 and then give it away for one hundred dollars, and not only the house but the land and everything connected with it? "Tis too preposterous to think about. One who would do this could do anything—sell the country to Canada, or anything else to suit an emergency and the public should hesitate before running into further danger!

Minimise The Loss.

Practically farmers may easily minimise the loss due to a backward and cold season, by the judicious use of Sulphate of Ammonia as a fertilizer.

Sulphate of Ammonia contains over 20 per cent of nitrogen, as against 11 per cent in Nitrate of Soda, and is therefore more than 25 per cent better than nitrate of soda as a means of quickening and increasing the growth of crops.

The use of Sulphate of Ammonia has increased enormously of late years and it is recognised to be the most valuable fertilizer obtainable. By its judicious use the production of root crops per acre may be doubled, and the growth of late crops stimulated.

We invite the attention of Farmers to our special pamphlet on the best methods of using Sulphate, copies of which will be forwarded free to any address on application.

The price of Sulphate is moderate and our terms are accommodating.

This Will Stop Your Cough in a Hurry

Save \$2 by Making This Cough Syrup at Home.

This recipe makes 16 ounces of better cough syrup than you could buy ready made for \$2.50. A few doses usually conquer the most obstinate cough—stops even whooping cough quickly. Simple as it is, no better remedy can be had at any price.

Take two cups of granulated sugar with one cup of warm water, and stir for 2 minutes. Put 2½ ounces of Pinex (fifty cents worth) in a 16-ounce bottle; then add the Sugar Syrup. It has a pleasant taste and lasts a family a long time. Take a teaspoonful every one, two or three hours.

You can feel this take hold of a cough in a way that means business. Has a good tonic effect, braces up the appetite, and is slightly laxative, too, which is helpful. A handy remedy for hoarseness, croup, bronchitis, asthma, and all throat and lung troubles.

The effect of pine on the membranes is well known. Pinex is the most valuable concentrated compound of Norwegian white pine extract, and is rich in gualic acid and all the natural healing principles. Other preparations will not work in this formula.

This Pinex and Sugar Syrup recipe has attached great popularity throughout the United States and Canada. It has often been imitated, though never successfully. A guaranty of absolute satisfaction, or money promptly refunded, goes with this recipe. Your druggist has Pinex, or will get it for you. If not, send to the Pinex Co., Toronto, Ont.
