DAYTON Money Weight Scales!

After deciding to locate in Newfoundland, we wished to obtain agency for the best computing scale made. We visited all the leading cities of the United States and Canada as far west as Chicago. We visited three computing scale factories, all of which offered us their agency. We talked with hundreds of users of various types of computing scales. The result of our investigation showed us that the Dayton Money Weight Scale was absolutely the best computing scale made, and that it would outwear any two computing scales of the swinging pendulum type.

We therefore closed the contract for the sale of Dayton Scales and have sold a number of them in St. John's and the various outports. Every scale sold is giving perfect satisfaction.

We are also agents for the Dayton Silent Meat Slicer and Dayton Cheese Cutter.

If you are interested in the most perfect weighing machine ever devised, write or wire

PALMER Marine ENGINES.

For Pleasure, Work, Speed.

Each type of motor boat requires a power plant of suitable style, horsepower and model, according to dimensions of hull, purpose used for and speed desired. The selection of the most suitable motor should not be guessed at, but should be the subject of careful consideration.

We sell the right motor for any power boat, whether used for pleasure, heavy duty purposes or fishing.

Where power and efficiency are of the most importance there you will always find

DELCO-LIGHT

Brings City Convenience to the Country!

DELCO-LIGHT consists of an engine, generator, switch-board and set of batteries. Electricity is stored up in the battery by means of the generating unit. Wires lead from the light and power connections to this storage battery, from which electric current is used as desired for light or power.

You will find DELCO-LIGHT to be a model of simplicity, the engine is started by merely pressing it on the starting switch located on the switch-board, and the engine starts running on its own power in a few seconds, and when battery is completely charged, engine stops automatically.

DELCO-LIGHT is air cooled. As a result there is no water to carry, no danger of freezing, and fewer parts are required.

DELCO-LIGHT has not been built to meet price. It has been constructed to give satisfactory electric service year after year, and the only reason it is possible to sell DELCO-LIGHT at the price we do is the big production, making possible a saving in the purchase of raw material and in manufacture. Consider the advantages of Electric Light. With DELCO-LIGHT you can distribute any number of lights about your house and outbuildings, no danger from fire, no disagreeable odors, plenty of bright electric light which protects the eyes when reading.

In addition, DELCO-LIGHT will furnish sufficient current to operate a motor from the smallest up to one-half horse-power size. Most light farm work can be accomplished with a one-sixth horse-power motor. A motor of this size will do the churning, the cream separating, the washing, and will operate an electric water pump and pressure system.

Literature and prices supplies on application.
