## The C.L. March Co., Ltd.

Corner Water and Springdale Streets.

P.S.—CARS STOP AT OUR DOOR.

### Adventures of "The Duchess."

There are many masterpieces on the walls of the Royal Academy this year, but their newness will probably not be a sufficient bait for the picture-stealer, who likes something "old and crusted," as a rule, with a pedigree and a price that runs to five figures.

There are collectors who are ready to buy a painting they want without being too inquisitive as to how the seller came into possession of it. Some collectors have even been known to become the thieves themselves, so great is their craving to own certain works of art. Though what use such possessions can be to them is difficult to imagine, since they must always remain hidden away through fear of detection.

Undoubtedly the most sensational theft in the history of Art was that of Gainsborough's famous "Duchess of Devonshire," known to everybody by innumerable reproductions.

This masterpiece, by one of England's greatest painters, was offered at Christie's sale rooms in King Street, St. James's, where the Red Cross Sale was recently held, for ten thousand guineas. That was on May 6th, 1876, just forty-four years ago.

Some days later they placed the picture on exhibition in their Bond Street galleries, and on May 28th, when the place was reopened, it was found that the famous "Duchess" had disappeared. The picture had been cut out of its frame with a knife, the edges of the canvas being left in the empty frame.

#### Hidden in a Cellar.

For twenty-five years the affair remained a mystery, and it was feared that the picture was gone for ever. At least, so the public thought, although there were some who knew otherwise. But whether it would ever be restored was in doubt to the very last.

The chief thief was a hyphenated German-American, named Adm. Wirth, a clever crook. His helper was a man twice his bulk, an Englishman named Jack Phillips.

Being a small man, Wirth climbed on Phillips' shoulders. The night was dark and Bond Street silent. By means of the awning, the German reached the window-ledge on the first floor, and gained an entrance to the gallery. There he carefully cut the picture from its frame, rolled it up, and departed by the way he had come.

But the masterpiece was no use to him: It was known to dealers in every city. To show it was to give the game away. Wirth got into touch with some solicitors, and held the picture to ransom.

The owners refused to compound a felony, so Wirth put the painting into a tin tube and built it into the wall of his cellar, where it lay hidden until the year 1901, when the world was surprised to hear that the lost "Duchess" was found and that a reward of £4,000 had been paid. The man through whose "good offices" the picture was restored was "Pat" Sheedy, a man of international notoriety. So, after the lapse of twenty-five years, the picture was again exhibited to the public, and proved a great "draw."

### The Very Thing.

She was evidently in a hurry, and the fierce glare in her eye aroused the young bookstall clerk from his reverie.

"Look here," she said. "I want a book for my husband. It's his birthday. And I want it for a present. Show me what you have and be quick about it! Nothing too expensive, mind you, and I don't want anything too cheap, either. He's a mild-mannered man and not fond of sports, so don't show me anything in that line. For goodness' sake, don't offer me any of those trashy novels, and no matter how much you try to persuade me I won't take anything in the way of history or biography. Come, now, I'm in a dreadful hurry, and I've already wasted too much time here. Of course, you don't know my husband, but from all I've said can't you suggest something appropriate?"

"Yes, ma'am," was the assistant's reply, after an instant's reflection. "Here is a little volume entitled, 'How to Manage a Talking Machine,'

### A Gift

A 10-Day Tube of Pepsodent is sent to all who ask. See coupon.

## See How It Pays

To beautify the teeth

All statements approved by high dental authorities

Millions of people now employ a new teeth cleaning method. Millions of white teeth show the results of it. This is to urge a ten-day test, to show what it means to you.

### They fight the film

This new way combats film—that viscous film you feel. That is what clouds teeth and what wrecks them. Most tooth troubles are now traced to film.

Film clings to teeth, enters crevices and stays. If not removed it hardens. Then month after month, between your dental cleanings, it may do a ceaseless damage.

It is the film-coat that discolors—not the teeth. Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea.

The ordinary tooth paste does not dissolve film, so the tooth brush leaves much of it intact. Thus very few people escape tooth troubles, despite the daily brushing.

Now dental science has evolved a film combantant. Five years of tests have amply proved

its efficiency. Leading dentists now everywhere advise it. And it is embodied for your daily use in a dentifrice called Pepsodent—an ideal modern tooth paste.

### Sent on request

A ten-day test of this new method is supplied to all who ask. Thus millions have seen the results of it.

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to day by day combat it.

Pepsin must be activated, and the usual agent is an acid harmful to the teeth. So this method long seemed barred. But science has discovered a harmless activating method, so active pepsin can be every day applied.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coat disappears.

See the results and let our book explain them. Then judge for yourself what is best for you and yours. Cut out the coupon so you won't forget.

The New-Day Dentifrice

A scientific film combantant which, after 5 years' tests, is now advised by leading dentists everywhere

### Advertise Bolshevism To Kill It.

"You don't need to persecute your Bolshevists in America. Just hand them a round trip ticket to Moscow. They will come back, in no time, enemies instead of friends of Bolshevism."

Such is the interesting statement made by Mrs. Philip Snowden, wife of the British Labor M.P., herself a member of the Labor Party, and one of the eleven Labor delegates who last April began a personal inspection of affairs in Russia. Mrs. Snowden is personally known to a great many Canadians, and she has never enjoyed a reputation for friendliness toward the powers-that-be in British political circles, so that her statements may be taken as quite unbiased. Mrs. Snowden remained a considerable time in Moscow where she talked with Trotsky, Lenin and other Bolshevist leaders. She also spent ten days in the smaller towns on the Volga River. To say the least, Mrs. Snowden was not impressed with Soviet methods.

Mrs. Snowden is strongly of the opinion that the truth in respect to the Bolshevist Government is all that is required to kill the movement throughout the world. It is a dead failure. In place of freedom there is oppression of the worst possible character. Over three-quarters of the population are practically voiceless, having no say in Government affairs. As Mrs. Snowden expresses it "the aim of Bolshevism is the good of mankind all right, but their way of getting it is absolutely opposed to human nature, for you cannot divide up everything equally to do so is a most disagreeable practice." She returned to

England with the firm conviction that there is no need of trying Bolshevist theories either in that country or on this continent, because already, by our present political system, everybody has equal opportunities. If things do not go as the people want them, they only have their own indifference and apathy to blame.—Saturday Night.

### Fraternal Enemies.

The battle of Talaïra, in which the English and Spanish forces defeated the French under Marshals Victor and Jourdan, on July 27, 1809, was destined unfortunately to be fruitless, owing to the complete breakdown of the Spanish co-operation, and the campaign as the whole proved to be a failure. But tactically it was successful, and to the more thoughtful of Napoleon's generals must have seemed ominous of trouble to come. Further, it was remarkable for the first display of that feeling of good fellowship and confidence between the French and English soldiers, which marked throughout their relations in the field in coming years. It happened that a small stream flowed through part of the battlefield, separating the combatants; and during a panic produced by heat and the fatigue of the troops, both sides went to the banks of the stream, and exchanged their brandy flasks and wine-skins. For the time being hostility was dormant, and the interval, also, was employed in removing the wounded, who lay intermingled on the hardy contested field, each endeavouring to extricate and carry off fallen friend and foe without distinction. Thus they busied themselves in perfect amity until the bugles sounded and the drums beat

"to arms." It was the signal to renew the battle, and the opponents parted, many of them with a shake of the hand and an expression of cordiality. Before very long they were meeting again at the bayonet's point in stern conflict. But, indeed, a rough regard, rather than rancour, characterised those honourable enemies, so much so that the terms of mutual respect and the friendly intercourse maintained, when possible, between the French and English armies have been commented upon by every writer on the Peninsula War.

Men's Tan Laced Boots, pointed English toe; "stunning style", worth \$17.50, only \$14.50 at Smallwood's Big Shoe Sale. July 22, 1920

### How to Pronounce "Meighen."

a kindly and thoughtful spirit Canadian Associated Press has out instructions from Ottawa as to the name of the new Minister is to be pronounced "Meighen" prefaced by the word "official" information, presumably comes one "high in authority." It is to

be uttered as though it were written Me-en. "The 'h' is 'Meighen' is not aspirated," says this authority. It is aspirated, so to speak. Or to put it in another way, the "h" is silent as in "Ampeasad 'Bath. The "g" disappears, though no mention of this unfortunate letter, which many persons are inclined to ignore on most occasions, occurs in the despatch. It also is silent, as in "gru" or "grat." No doubt the Scottish elements from

which the new Prime Minister springs will regard the instruction as superfluous; but it is just as well that there should be no fumbling over his name by persons of less fortunate lineage.—Saturday Night.
