New Primary Laws COMPEL CANDIDATES TO COME FORWARD.

sept11,tf

Washington, Sept. 18.—The presidential primary, now the vogue in a full score of states, not only has become the bug-bear of many old-fashloned political bosses, but is also accomplishing the rout of the timehonored practice of delaying the announcement of candidacies until the last possible moment. To-day in many states candidates must climb down off the fence many weeks before the national conventions, and say whether they will or won't

The beginning of the 1924 primary eason now is a bare six months away, and the filing of papers required of candidates in many cases already has become a burning question among those who cannot decide whether they hear a commanding popular call for their services in public office. Such decisions must be made much earlier than the average for pre-presidential years in the past.

The first primary, that in New side of the disk. orth Dakota will follow a week later, nd seven additional states, controll-

MARKET REPORTS

indicate that there is no surplus of Anthracite Coal in the U.S. The shortage caused by the strike of Anthracite Miners last year has not been made up, and American hard coal will, in all probability, be hard to get and high priced. Coke is an excellent substitute for hard coal, and we have on hand a stock of same that will soon be disposed of, because a shortage of hard coal invariably creates an increased de-

mand for our product.

We advise our customers to book their requirements as soon as possible.
