All diseases of the respiratory organs treated by medical inhalations, combined with proper consti-utional remedies. OZŒNA.

OZENA.

Ozena is the professional or technical name given to an advanced form of catarrh in which ulceration has eaten through the membrane lining of the nose to the cartilage of the bone. Any case of catarrh may end in ozene, but it most frequently occurs in those who are naturally scrotulous. The discharge takes place through the nostrils or shrough the throat, and is generally of a yellowish or greenish yellow color, frenquently tinged with blood, and hlmost always attended by an offensive smell. In the language of Dr. Wood, of Philadelphia, "the disease is one of the most obdurate and disagreeable which the physicians has to encounter. In bad cases the breath of the patient becomes so revolting as to issolate him from society, and to render him an object of discust even to himself."

In some instances pieces of bone become separated and though off, leaving deep, unhealthy ulcers, which secrete a blood matter, and are extremely difficult to heal.

After Ozena has continued some time the sense of smell usually becomes impaired and often lost.

Deafness is one of its most common consequences, and results from its extension through the custachain tubes to the internal ear.

ain tubes to the internal ear.

Pains in the head and over the frontal sinuses, imprring memory, and even insanity, frequent'y spring from its extension to the brain.

The greatest danger, however, because the most common, is that it will extend downward and affect the lungs. In mort cases of pulmonary disease catarrh is present in some degree, and in many instances it causes a large share of the patient's discomfort.

Besides these grave consequences, all of which are lible te spring frem scrofulous catarrh or Ozoma, shere are others which, if less dangerous, are sufficiently unpleasant. It occasions great unhapiness to thousands of both sexes, by isolating them and preventing their settlement in life. An offensive running from the nose, with foul breath, is about as great a calamity as can befall young people.

The treatment of this disease requires much care and perseverance to conduct it, to a successful issue. The remedies must be carefully adapted to the stage of the disease in each case, and applied directly to the parts affected, which may be done by the patients themselves, whereever they may be, and without hindrance to their daily occupation.

I have seen so many of those cases saved by inhalation that I ca mot doubt its curative powers or regard any case necessarily hopeless unless both lungs are extensively involved. The great vriue of inhalation in the treatment of all head, threat and lung complaints has been indorsed by all the leading medical journals of England, France and Germany. If possible call personally for consultation and examination, but if impossible to do so, write for a "List of Questions" and "Medical Treatise." Address

The "Town "of Moberley Being Hawked Throng the Province—Manitoba City Another Fraud. OTTAWA, March 3.—In the house to-day a bill was read the first time incorporating the Presby. Guelph and Berlin were the last places at which they were offered. They were sold at Oliver's auction rooms in this city twice, and twice The World exposed the fraud. We have been informed that a letter showing up the whole thing was sent to the Globe, but so far it has not appeared. Here is what the Manitoba Mountaineer, of Nelsonville has to say of Moberly and another fraud, Manitoba

concerning the 35 new metodries established under the national policy.

The discussion on the budget speech was constituted by Mr. Boultbee who alternately denounced string by Mr. Boultbee who alternately denounced the fiscal policy of the government for an hour and a half. He almost swore that there was nothing but rank nonsense in the thirty columns of Anglin's speech of Tuesday last, and couldn't understand how anyone could get up and put forward such arguments as the member from Gloucester had done. He alluded to John Gibson of Markham as a good conservative (to which Sir John said hear hear), and informed the house that the N. P. was beneficial to the farmers because that gentleman at public meeting in East York had declared this to be the case. The hon. member also brought up the name of Mr. Spreght, of Markham, and other electors of East York and declared times that he constituency to the house in as favorable light as he could. He asserted two or three limes that he had spent an hour reading the melanton make anything out of that member's miserable narrow wailings and his party prejudices. The speaker at length subsided.

Mr. G. W. Ross followed, and dwelt on the increasing expense of governing the country, and endeavored to show that the N. P. was a failure. The tariff was diminishing the volume of manufacturers to compete in the market of the world. The burdens of the tariff were unfairly distributed among the consumers. The speaker continued for over two hours, bringing up all the old stock arguments against the government and its policy.

John McLellan and Mr. Renfret followed, and Mf. Piumb moved the adjournment of the debate.

Chester county and contiguous to the rivers and creeks are submerged. The houses are surrounded

cent attempt on her msjesty's life and assurance of their loyalty to the crown was passed to-day by the commons and senate.

In the commons the motion was made by the premier, who was glad to be able to state that the attempt on the Queen's life had not been made from any political reasons, or on account of discontent among the people.

Mr. Mackenzie seconded the motion, and paid a high tribute of respect for the sovereign. He could not conceive any greater disaster that could happen than that such an attack should issue fatally. Her majesty's character had been such as greatly to elevate the whole tone of society in Great shritain. Apart altogether from the virtue which she possesses as a sovereign, her personal virtues are such as to commend het as the first woman in the world to all who love the exhibition of the highest phase of domestic virtue. (Hear, hear.)

Mr. Blake was not in the house this afternoon, which was the reason for his not being called on to second the resolution. The address was engrosed and is to be cabled to-night.

THE BOWNG BLACKROD.

Shortly after the speaker took his seat this evening the house was surprised with a visit from black-rod who rapped three times at the door and was there-upon/officially confronted by the sergeant-at-arms and at that juncture these two dignitaries bowed solemnly to each other. Being informed that as messenger from the excellency was at the door the sneaker took in the social country will cause much damage.

The gondola as a means of conveyance is not in favor in this western country."

We observe an advertisement in the Free Press announcing a sale of Nelsonville lots on the Tisdale estate on Thursday evening last. In this advertisement the property is alluded to as "The Tisdale estate, the best-part of Nelsonville." There is only one way of characterizing such an assertion, and that is to call it by its proper name—a downright and intentional lie, and a swindle on the public.—
