THE WORKS.

FEED UP TO 40 FEET A MINUTE.

"It is in the contemplation of the superhuman accuracy with which these marvellous machines do their delicate work that the immense value of such appliances is borne in with irresistible force upon the mind of a spectator. Anything more remarkable than the precision and exquisite finish with which every detail of the work is carried out cannot easily be conceived."—*British Mercantile Gazette*.

"We can only say that having seen most of these machines in actual every-day use in mills and works in different parts of the country, we have never come across one which, under capable management, did not perform its allotted task with that measure of efficiency and speed essential to perfection of production and economical working."—*British Architect*.

"Some idea of the economy effected by the use of these machines in preference to the ordinary type may be arrived at when it is understood that while doing more than twice the work of one machine, they do not cost so much money as two machines, take up less than half the space, and only about half the horse-power, besides the fact that the labour for running the second machine is entirely obviated."—*Timber*.

## HELLIWELL'S PATENT.

GLAZING WITHOUT PUTTY!
