ment these sources of Revenue are quite inadequate to the Hospital's very modest requirements, and wholly unworthy of its many well-wishers and should-be supporting friends. There are, of course, noble exceptions, and indeed, were it not for some large gifts classed as "extraordinary donations ", the " Maintenance acct." would have gone seriously behind during a term when "Hospital Revenue" is greatest. The "ordinary subscriptions" during the same fruitful term have scarcely averaged \$100 a month, and as these are the main reliance of all institutional effort, the Committee feel they should have at least \$3000 subscribed and placed at their disposal anually to ensure comfortable management and satisfactory results.

The few workers cannot devote further time to make a personal canvas, but the Secretary, Mr. J. R. Bain, will endeavor to call upon all who may be interested and enlist their aid. He has our full authority and we bespeak for him a cordial reception. Friends of the cause would, however, particularly gratify the committee if they will send in their contributions—be they little or much—direct to the Treasurer without waiting to be called upon. A subscription of \$100 carries a Life-Governorship without further obligatory annual dues.

The debt of \$6000, brought forward in the new books to a "Suspense account," still faces us and appeals for liquidation

Hopefully yours,

SAMUEL BELL,

President, Montreal Homocopathic Hospital.

Doctor—Your wife, sir, is suffering from general functional derangement.

Mr. Parvenue—I know it. I told her she'd be sick, gadding around to all these swell functions as she calls'em. Now she's got functional derangement. Is she liable to be violent, doc?
