RONUK FLOOR POLISH

The superiority of Ronuk will be at once apparent to any architect or builder who will investigate its merits.

Ronuk sinks into the pores of the wood, instead of lying on the surface, and forms a finish, smooth, beautiful, and durable, and easy to keep so. Ronuk is an effective antiseptic and germicide, a preservative to the wood and never requires scrubbing. It is most economical to use—a little of it covers a large area.

Ronuk is an excellent dressing for linoleum, improving its appearance, lengthening its life and doing away with scrubbing.

Ronuk Limited, Contract Department, will undertake the polishing and maintenance of floors for institutions or residences. Ronuk is in use by such institutions as New Central Y.M.C.A., Toronto; Notre Dame Congregation, Montreal; Appleby School, Oakville; Parliament Building, Toronto; City Hall, Quebec; Private Patients' Wing and Obstetrics' Wing, New General Hospital, Toronto; C.P.R. Dining Rooms, Montreal; And many others, a complete list of which will be sent on request.

For further information about it write

Improving the Steam Plant

Waste of Fuel and Power through Condensation Losses amounts to a large sum in the course of a year. Old and inefficient Steam Traps are responsible for these losses.

How Morehead Traps stop the loss and raise dividends is shown in this little book. A copy will be sent to anyone interested.

Write to-day.
