

PROFESSOR (in physiology lecture).—"In 1857 two Englishmen conducted experiments on the fattening of pigs." (Enthusiasm among the Meds.) "Does that recall tender memories?"

A large deputation from the Alumni Association and its local branches is to wait on the Ontario Government to-morrow in the interests of the University. In the evening the biological and mineralogical museums will be thrown open for inspection, and lectures will be delivered in the biological amphitheater by several members of the Faculty in the physical sciences.

A youth of poetical tendencies, musing while the fire burned, and allowing his thoughts to drift to the characteristics of the Old Lit Party, broke out in the following impassioned lines:—

"There's a deepness in their scheming,
Like the deepness of the sea;
There's a something in their statements,
Which is more'n veracity."

The First Year debating society has held two meetings this term, both of which have been very successful, indeed. At the last meeting several recommendations were also made: "That a number of safety razors be purchased for certain members of '04"; "that Gustavus Adolphus Schaefer be admitted to the South African constabulary on account of his display of gallantry on the night of the undergraduate concert"; "that leather medals be presented (1) to J. J. Creelman for his excellent display of bravery on the night of the nineteenth of February, and (2) to Hamilton for a similar display on the same occasion."

THE ROYAL MILITARY COLLEGE.

There are few national institutions of more value and interest to the country than the Royal Military College at Kingston. At the same time its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government institution, designed primarily for the purpose of giving the highest technical instructions in all branches of military science to cadets and officers of Canadian Militia. In fact it is intended to take the place in Canada of the English Woolwich and Sandhurst and the American West Point.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and in addition there is a complete staff of professors for the civil subjects which form such a large proportion of the College course.

Whilst the College is organized on a strictly military basis the cadets receive in addition to their military studies a thoroughly practical, scientific and sound training in all subjects that are essential to a high and general modern education.

The course in mathematics is very complete and a thorough grounding is given in the subjects of Civil Engineering, Civil and Hydrographic Surveying, Physics Chemistry, French and English.

The object of the College course is thus to give the cadets a training which shall thoroughly equip them for either a military or civil career.

The strict discipline maintained at the College is one of the most valuable features of the system. As a result of it young men acquire habits of obedience and self-control and consequently of self-reliance and command, as well as experience in controlling and handling their fellows.

In addition the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures good health and fine physical condition.

An experienced medical officer is in attendance at the College daily.

Five commissions in the Imperial regular army are annually awarded as prizes to the cadets.

The length of course is three years, in three terms of 9½ months' residence each.

The total cost of the three years' course, including board, uniforms, instructional material, and all extras, is from \$750 to \$800.

The annual competitive examination for admission to the College will take place at the headquarters of the several military districts in which candidates reside, in May of each year.

For full particulars of this examination or for any other information, application should be made as soon as possible, to the Adjutant General of Militia, Ottawa, Ont.
