
The Internet Column

Q

What is an URL?

A

A Uniform Resource Locator, commonly referred to as an URL, is the unique address of each page of information on the World Wide Web. It can be found in the Location field of Netscape. These URLs can be quite lengthy or very short.

`http://folio.lbp.DFAIT-MAECI.CS.CA/english/branches/corporat/index.htm`
or
`http://www.cbc.ca/`

Instead of remembering the URLs, or having to write them down for future use, you can use the Bookmarks feature of Netscape to do this for you.

Q

How do I create a bookmark?

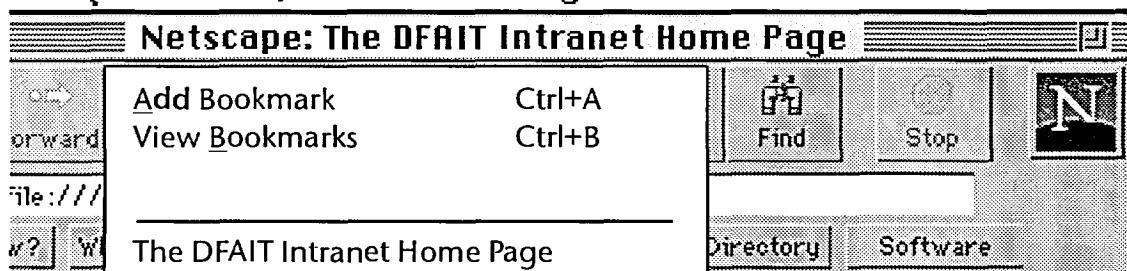

A

You must be at the site you wish to bookmark, then:

- Click **Bookmarks** from the Netscape Main menu
- Select **Add Bookmark**

Your Bookmark is added at the bottom of the list under View Bookmarks. The title of the page becomes the title of your bookmark.

Bookmarks Options Directory Window

Selecting the bookmark of your choice will connect you with the site.
