

STYLE A

Draughtsmen's Pedal Designing Table

DESCRIPTION

THE cut on opposite page represents our Pedal Designing Table, Intended for sketching and designing, and is specially adapted for drawings for patent office, and for laying out and designing by architects and others. The Drawing Board is operated by pedal, upon which the feet rests, leaving the hands free to work. By the circular motion of the table by the use of the pedals the table stops at zero with one foot or 90° with the other, thus producing a mathematical right angle at once. It is made of solid oak, rose wood or mahogany finish, side rule scale, celluloid protractor, sliding rule on straight-edge, paper fasteners, adjustable 90° stops, copy holder, tool tray, and other improvements covered by patent. This will be found a very convenient table for general use. Size of paper, 16 x 13 and smaller.
