

PROMOTE HOME OWNERSHIP

You and your family must live somewhere. The reason you do not buy a home is the fear of going into debt.

You now have hanging over you a debt of \$30.00 or more every month for rent. A stack of rent receipts are worthless. If you are sick or lose your job, your rent goes on just the same. You could not go any more into debt if you bought the house.

Rent at \$30.00 a month in ten years amounts to \$4,745.04, including interest at 6%. You have paid for this house and lot in ten years, but the landlord still owns it, while you have protected it for him.

Begin now, by acquiring a home site, making a small down payment. There are thousands of choice locations which will advance rapidly in cost soon.

There is a corner in land. No more will be manufactured. *Any fool can look behind, but it takes brains to figure out the future.*

Own Your Own House and Owe No Man
