The Toronto market, considering the action of outside markets, must be accepted as strong in yesterday's dealings. The explanation of this was difficult to discover, but the volume of transactions was fairly large, and prices in general were firm and in some epots. The canadian General Electric was again an outstanding feature of the speculation, with sales as high as 15% correct then a point sbove the sales of last week, and the advance was held until the close. The annual meeting of this company will be field next week, and if rumor is correct there are to be several dianges in the management. New York, March 14.—Practically the same adverse influences which contributed in measurable egree to the depression of the stock market prices last week were operative again today, a number of new low records being registered. The foreign situation, the precarious position of the railroads and the state of deadlock existing in some of the laading lines of industry were once more the factors which precipitated fresh liquidation and emboldened the shorts to extend their commitments.

Statements of earnings submitted over the evelx of the steady decline of railroad tonnage and the detached or indifferent attitude on companies and manufacturers of staple products offered striking evidence of the steady decline of railroad tonnage and the detached or indifferent attitude on consumers.

The stronger position of the admentic banking situation, as demonstrated by the new early reports of the local clearing house and the federal reserve branches almost as a whole, was ignored in the Loan, Tr., C. Land ...

A. L. Hudana & Company report state of the control Steel of Canada reacted somewhat after last week's advance and Winnipes Railway was weak, with small sales. There was a good demand for the bonds, and prices in these were steady to firm. Sellers were more plentiful than buyers last week, but yesterday's record of the market seemed to indicate that the investment demand had caught up again with the supply, and that any anticipated reaction was not likely while this was in effect.

LOWER PRICE TENDENCY

ON MONTREAL EXCHANGE

Montreal, March 14.—There was some reduction in trading and a tendency towards declines in today's local stock exchange market. Only two issues furnished better than a thousand shares to the trading, Abitibi and Breweries, of which the former eased a fraction and tae latter netted a fraction. The largost rain, one of sive points, went to the unactive Sherwin-Williams, which had not been dealt in since last month.

The paper's as a group were not strong. Prompton eased a fraction, Riordon was a free. All those interested in these distale latter netted a fraction. The largest rain, one of tive points, went to the in active Sherwin-Williams, which had not been dealt in eince last month.

in the productive area, but I believe it is there."

This seems to be a fair diagnosis of the situation. One cannot but feel that the unsuccessful prospecting operations of the past 15 years have not been skillfulfy conducted. On the domains itself, the outlook for oil is excellent. The structure appears to be lightly favorable. L. G. Finch, the president of the Canadian Oil Fields Limited, has made an earnest study of the geological conditions, and has employed many able experts to assist in this work. His faith in the field and the energy he and his various assistants have shown in their efforts for to make it productive, certainly deserve a full measure of success.
