### LOOK FOR ADVANCE IN PRICE OF SHOES

Marked Increase in Leather May Force Rise in Footwear.

(Toronto Mail and Empire.)

The Shoe Manufacturers' Association of Canada has issued a circular letter to its members, calling attention to the hide and leather market situation and pointing out the importance, before the manufacturers accept orders at present prices, of ensuring that they can obtain leather to make shoes at the prices quoted. The association states that hide prices have been moving upward for several months, and that a further sharp advance occurred last week. Heavy steers (pecker) hides, from which sole leather is made, sold in Chicago at twenty cents per pound, and light cowhides at 18 1/2 cents. These prices are from forty to fifty per cent. higher than those which obtained a year ago. Calfskins have advanced about twenty-five per cent. The hide market continues strong. Most of the tanneries' stocks are low, and there does not appear to be any surplus.

Leather prices now are advancing, although not yet fully reflecting the increase in the replacement cost of hides. Prices of certain lines of upper leather already have advanced, while sole leather prices are up about ten per cent. on export orders. A further radical mark up of prices on all leathers seems inevitable, if the hide market holds at present levels, as is expected by the trade.

Now, if any, of the shoe manufacturer

ers have large stocks of leather on hand. They cannot say more for leather and maintain present prices unchanged. Careful analysis of the hide and leather market situation indicates that early advance in manufacturers' prices of leather footwear cannot be avoided."

(Amherst News.)

The report of fire losses for the month of June issued by the Fire Marshal for Nova Scotia, does not indicate any lessening in the number of fires. The property damage shows some decrease, as compared with the same month of last year, but the total number of fires increased from 80 to 93. The statement of causes as given below shows at a glance what a large proportion of the fires was preventable:
