#### METAL AND MACHINERY

In its summary of the iron, steel, metal and machinery markets for the week ended July 26, Canadian Machinery and Manufacturing News, Toronto, makes the following comment:

It is not very often that the scrap metal market is called on to provide the best news for the week, but such is the case this time. The big dealers in Toronto marked the whole list up this week, special attention being paid to anything in the line of copper.

The metal market regards it as certain that there will be a big export demand for copper very soon, and as there is not a great quantity being produced locally to labor troubles, the prices are due to go higher. Not only that, there is a demand for scrap metal.

The foundries and the steel mills are buying material now and there is a lot of business moving.

Machine tool dealers still have to contend with the problem of getting the buying public away from the used machine tools.

When war ceased, many of the inquiries that came to the dealers contain the request that prices should be quoted on used as well as new machinery. There has been no concerted action on the part of the dealers in regard to the policy to be followed on the taking in of used material.

Some firms are always in the market for it and as a result other dealers, against their will, are forced on taking away old equipment if they are going to sell new.

One thing that makes used equipment attractive is the price of the new material. Prices are not far from 100 per cent above pre-war days, and even now talk comes of increases. Some of the big shops have given a shorter work-day with the old wages, which amounts to an increase in costs, and the makers threaten to pass it on in the way of higher selling prices.

Pittsburg steel mills report that they continue to work near to capacity. Plate is probably the weakest spot in the steel market at the moment. Reports indicate that while 2.65 is the nominal quotation, there are cases where as low as 2.50 has been the price at which a fairly good quotation would be closed.

#### MARITIMES TO HAVE NEW SIZED APPLE BARREL

(Canadian Grocers)

A new regulation apple barrel, to hold 100 quarts, will be in use in the maritime provinces this year, and Deputy Minister Bradt is now making arrangements for providing the necessary supply.

The new barrel will hold four bushels, and is being made in use in the maritime provinces, although smaller than that which Ontario and Quebec growers have used.

There will be a uniform barrel throughout Canada, and it will be illegal to use any other size.

Deputy Minister Bradt said that he believed the required supply of barrels could be supplied by mills at Oromocto and
