Woodstock, Nov. 19.—One of the engineers engaged on the Woodstock and Centreville railway told your correspondent today that the past week is has been very fair working on the road. Hogan & Smith, who have it sub-contract near Centreville, began at Wilmot Bullock's lower here. They have the work all finished ready for rails four miles below that point. The next two miles run through the woods. and progress is rather slow. Probab-ly seventy-five men are working or this section. Coming towards Wood stock, Hugh McIntyre's job is next. He has graded from a point eight miles from town to Jacksonville corner, and expects to move right away to the old Marvin house, and work from the Connell road. Wm. Atmore is working between the Connor and Connolly roads. He has fifty men at work. Mr. McFarlane is busy clearing up this side of the Connolly road. In order to rush the work it is now necessary that the remaining right of way along the road should be secured.

Sackville, Nov. 21.—On Friday even-Sackville, Nov. 21.—On Friday evening the fadies of St. Paul's church gave to a farge house one of their delightfully gotten up entertainments. The programme, which consisted of a farce, tableaux, readings and music, was well carried out in every particular, each number receiving a heanty encore. In the farce, which represented a scene in a collegian's parlor, the stage arrangements were most effective, and the performers all took their parts with great spirit. Mr took their parts with great spirit, Mr. Teed as Prof. Shreedy being perhaps the most realistic. Miss Fanning of Mount Allison, sans a solo from Sam-son and Delilah with exquisite purity of tone and most finished technique, and im response to unappeasable appliause gave a beautiful little gem of a song with infinite pathos. Miss Webster, also of the ladies' college, recited Aldrich's sadily sweet ballad of Baby Bell with charmingly clear enunclassion and dramatic force. The tableaux and limelights were all very attractive, the Garden of Sleep so with the soft music rendered by Miss Fanjoy behind the scenes. The

tableau vivant, in which Lovel Harserenades the wrong lady, brought down the house. One of the strong numbers of the evening was Albert Talit's reading, his interpreta-tion and rendering of the soul of the violin being unusually good. The performance closed with a good night drill by ten little maidens in night alttire carrying lighted candles, who went ithrough numerous figures with great precision. A great deal of credit for a most entertaining evening is due to three young ladies who were chiefly instrumental in getting up the affair, Miss Robinson, Miss Grace

If there is any reason why you should use any sarsaparilla, there is every reason why you should use Ayer's. When you take sarsaparilla you take it to cure disease; you want to be cured as quickly as possible and as cheaply as possible. That is why you should use Ayer's: it cures quickly and cheaply—and it cures to stay. Many people write us: "I would sooner have one bottle of Ayer's Sarsaparilla than three of any other kind." A druggist writes that "one bottle of Ayer's will give more benefit than six of any other kind." If one bottle of Ayer's will do the work of three it must have the strength of three at the cost of one. There's the point in a nutshell. It

NOVA SCOTIA LUMBER NOTES

D. Buchanan of Apohaqui came over in the Alpha on Friday. He has been engaged for nearly three months plac-ing a lot of new machinery in the mill of Harlow & Kempton at Milton, N. S. The firm have increased their plant and are also adding a door and sash factory. Power for the sawmills is derived from two of Mr. Buchanan's turbine wheels, and he is to put in another for the new factory. The lumber cut in that section will be large this winter. Horlow & Kempton will probably cut five or six million feet. A large tract of their timber lands was burned over last season and they will out the timber as quickly as possible. They manufacture boards, scantling, ship stuff, leths, box stuff and onion crate stuff. The mills of E. Diavison & Sons are all running. Moneton, Nov. 22 .- Moneton is almost panic stricken by the operations of a gang of burglars and sneak There were four robberies last week, the most important being the entry of the residence of A. E. Killam, M. P. P., where over seventy dollars in cash was taken from the bureau drawers, and Ross' tailor shop, which was entered and the cash box in the safe carried off.

Last night or early this morning Youngers' dry goods store was burglarized, a pane of glass being cut out of the rear window, and the robbers carried off about five hundred dollars' worth of goods, including gloves, mits, shirts, underwear and other goods. Younger's stock of these goods was pretty well cleaned out, and the robbers must have had a team to carry off the plunder. The police seem to be completely at sea as to who the guilty parties are.

When a man named Wilcox went home to dinner one day last week he found a note from his wife saying that she was tired of living with him and had decided to leave. They had no children. There is no trace of the milssing woman, and Wilcox, who appears to have taken the matter quiet-

ly, has broken up housekeeping. An Intercolonial railway fireman named Wesley Myles, running between and River du Loup, died at Campbellton on Saturday as a result of injuries sustained by falling from the tender of the engine while taking water at Causapscal on the previous day. About two inches of snow fell here last night and as the weather is cold there is fair sleighing.

The I. C. R. freight shed at River du Loup was destroyed by fire Saturday morning.

JOHN L. SULLIVAN

Suffering from a Cancer in the Right Arm and Amputation Will be Necessary.

New York, Nov. 21.-The Evening World says: "The pitiable condition which the former champion John L. Sullivan will be left in should he lose his arm-as it seems almost certain he will-has moved the big-hearted sporting men of the country as they have rarely been moved before.

Sullivan is suffering from a cancer on the right hand, and although he has had the best of medical treatment in one of the Boston hospitals, the disease has become so firmly seated and has developed so rapidly, that it is about settled that the champion can only save his life by losing his arm. This is the present conviction of the doctors who, perhaps, would have performed the amputation before this but for Sullivan's peadings to spare him as long as there is a ghost of a chance of saving him from being made cripple for life.

John L.'s unhappy condition has only been known to the sporting men of the country for a few days, and a number of them have suggested that it would be the right thing to give the game old boxer a benefit.
