MISS BESSIE FOLEY
MOURNED BY MANY
Young Girl, Twenty-Three
Years Of Age, Ill
Five Months

The sad death of Miss Bessie Foley, daughter of John Foley, occurred on Sunday last at the home of her parents at Corn Hill, Kings County, after a lingering illness. The young lady, who was in the twenty-third year of her age, took ill about five months ago, and since that time she has slowly continued to decline in health. A short time ago she went to the States to receive the treatment of specialists. But death, as inevitable, so she returned to her home in Kings County. It was seen that death was rapidly approaching, and on last Sunday she peacefully passed away. Her last words were an appeal to God to take her, as she was prepared and anxious to die.

The deceased is survived by her parents and three brothers and three sisters. The sisters are Mrs. Charlie Upham, Mildred and Lottie, all residing at Cornhill. The brothers are: R. J. traveller for James Pender & Co. of this city, Albert of Cole's Island, and Sterling.

The young lady was well known in Kings County and also in the city, and by her many acquaintances she was held in high esteem, being pos-

**DYNAMITE IS
THE CAUSE OF
BAD ACCIDENT**

Frank Webster, the nine-year-old son of Duncan Webster, 122 Adelaide street, and a young son of street Railway Motorman John McCollom, indulged in some costly play yesterday afternoon. The McCollom boy has a nasty cut in his leg to show and Young Webster will lose three fingers of his left hand by amputation.

It seems as if negligence on some person's part was as much to blame for the accident as the meddlesome nature of the boys.

The previous pair secured a number of dynamite caps with which they proceeded to conduct some interesting experiments on the doorstep of the Web-

ster home. In an inch and a half plank which forms the step, a memento of the incident is to be found. The metal portion of the cap was driven clear through its thickness. What would have happened had a vital portion of the boy's body happened in the way of the pellet may be easily surmised.

The lads secured their deadly plaything in a house which is being erected by Mr. Seymour on Micmac street. Dynamite is being used in quarrying out a sewer on the property and the caps had been left in none of the rooms of the house by the men at work on the job. In rambling through the boys ran across them and made a clear getaway. Adelaide street reached, one of the caps was placed on the Webster doorstep, a nail was placed over it and a large stone was applied to the nail to start the celebration.

The tops of three of the Webster boy's fingers were blown off, and Dr. W. F. Roberts, who attended him, is of the opinion that amputation will be necessary, as gangrene is setting in.

**WILL REPORT
TO THE GOV'T**

MONCTON, N. B., Aug. 20.—Mr. Chandler concluded his address before Commissioner Toed a half an hour after the opening of the Kay inquiry this afternoon, taking up the matter of renewal execution fees retained by Magistrate Kay.

these fees haven't been returned to the city because of the system that prevailed in the city court office. Kay, he contended, hadn't dishonestly withheld the fees and there was no evidence to prove such a charge. At the close of the argument the commissioner said he would report to the government in due time.

Magistrate Kay has sent a letter to the press offering to pay to the city fees he has unwittingly retained.

Ben LeBlanc and Brother, Tilman were arrested here this evening by the police on a charge of breaking and entering Fred Bourque's house on Palmside road this morning and stealing forty dollars in cash. When taken to the police station one of the prisoners confessed and disclosed the hiding place of the money. They buried the money on the outskirts of the city and the prisoner confessing took the police to the spot and the money was recovered.

**PART OF PLANT
IS DESTROYED**

NELSON, B. C., Aug. 20.—The Hall mines, just south of here, suffered loss by a fire this morning, which started in the compressor plant and destroyed the compressor building and machinery. The loss is estimated at \$15,000, fairly well insured. The office, transformer building, bunk and mess house and the machinery in the upper mine workings were saved.

**PUTS A PISTOL
IN HIS MOUTH**

Strange Suicide of Halifax
Man In To-
ronto

TORONTO, Aug. 20.—A suicide under peculiar circumstances took place some time during the night at a rooming house on Jarvis street, when Alfred E. Brown put the barrel of a bull dog revolver in his mouth and pulled the trigger.

The body was found this morning by another roomer of the same house. When his effects were searched by the police it was found that he had accounts with three different banks, totalling \$1,848.25. In the pocket of a pair of trousers was found with a lot of other clothing done up in a bag, a purse containing \$190.07 in cash.

There was also a hand grant scrip with the name of William Foley on it, which led the police to believe at first that such was the dead man's name. Foley belongs or belonged to Halifax, and served with the fourth Canadian regiment in the South African war. He secured a land grant in January last, and his discharge the month envelope addressed to following.

WILL ORGANIZE CANADIAN NAVY

British Admiralty Loans
Canada Naval
Officers

HAS NO CONNECTION
WITH PUBLICATION

LONDON, Aug. 20.—The admiralty has loaned to Canada a number of naval officers who shortly will proceed to the Dominion and advise on the work of organizing the new Canadian navy, in accordance with the plan agreed upon with the Canadian delegates to the imperial defense conference. The British government is availing itself of the opportunity to obtain a full and complete knowledge of the Canadian parliament of the decisions reached, and it is understood that the work will begin as soon as this is given.

Slick Individual Working
Several New Brun-
swick Towns

William Collins, checker for the L. R. C., vice-president of the Canadian Brotherhood of Railway Employees, has received from A. R. Mosher, grand president of the order, word that a very sick individual was working St. John, St. Stephen, Fredericton and other New Brunswick towns for advertisements for the official organ of the Brotherhood. The man has no connection with the Brotherhood's journal, but it is said that he obtained several large sums from St. John merchants for bogus advertising contracts. He was known to be in this city a few weeks ago. In one instance he was about to cash a check for \$400 which he had received on false pretenses when payment was prevented at the bank.

Formerly the man was connected with the International Brotherhood of Railway Employees, an organization which has been out of existence as far as this part of Canada is concerned for about a year. He tells a very plausible story about the Canadian Brotherhood being a young organization and needing all the help it can get. His record will be looked into and if possible the police will be asked to deal with him.

Due to Tuberculosis
Giving evidence before the Postal Commission, which is now sitting at Sydney, New South Wales, Mr. Phillips, vice-president of the Letter Sorters' Association, stated that during the last twenty years eighty percent of the deaths among letter sorters had been due to tuberculosis. The men have contracted the disease after they have entered the service. The mail matter, which comes from every part of the world, contained a vast amount of infected material as consumptives licked the stamps. Envelopes and letters might come into the sorting rooms with enough germs to poison the whole staff.

The West Indies royal commission, to which Hon. W. S. Fielding and Hon. Wm. Patterson were appointed, held a meeting for organization today at the Colonial Office. Lord Balfour of Burleigh, president, and all the members were present except Mr. Patterson. The British commissioners, Lord Balfour of Burleigh, and Sir John Dickson-Poynder, Bart., will sail for New York, Sept. 11, being unable to secure accommodation by Canadian liners. It is expected that the first meeting will be held at Ottawa on Sept. 11 and meetings will follow of commercial bodies, if they so desire at Toronto, Montreal, Quebec, Halifax and St. John. Two or three weeks will be occupied in these hearings. The commission will then adjourn for several hearings in the West Indies during one of the winter months.

**RETIRED IN GOOD HEALTH;
FOUND DEAD IN BED**

It was a sad shock to Alfred Mason, who resides at the foot of Millstream, Kings county, when yesterday morning he found his wife, who had retired in the best of health, lying dead in her bed.

Mrs. Mason, who is about fifty years of age, was a strong, robust woman, who had never been ailing a day in her life. On Thursday evening she retired quite early, apparently in excellent health, she having been able to attend to work on Thursday the same as usual. But in the morning she was found dead in her bed, which was a great shock to her husband and to her friends. The death was sudden and quick spread.

It was not known last evening what the cause of the woman's death was or at what time during the night the woman passed away.

It was reported last evening that death was due to heart failure, but this rumor cannot be confirmed. The deceased was survived by her husband and leaves no family. The news of the death soon spread throughout the community and was a great shock to the community.

There was a meeting of the executive of the Exhibition Association yesterday afternoon. The committee's which were to present reports did not have their work sufficiently advanced to make reports. They were continued and will report at a subsequent date.

**ATTEMPT TO
RUIN PLANT**

PITTSBURGH, Pa., Aug. 20.—An alleged attempt to set fire to the plant of the Pressed Steel Car Company at McKees Rocks early today, followed by much disorder when the striking employees of the car company fired several shots at over a hundred new men who were being taken into the works about noon, kept the state constabulary and deputy sheriffs on the alert for 12 hours today.

New cars shipped away today indicate that the company is successful in operating the works at least on a small scale with the imported workmen.

The women strike sympathizers became excited during the afternoon and a number of them gathered at the gate of the car plant and threw heavy paving stones over the stock yards.

**DIARRHCEA, DYSENTERY, COLIC,
STOMACH CRAMPS,
CHOLERA MORBUS, CHOLERA INFANTUM,
SEASICKNESS, SUMMER COMPLAINT
and all LOOSENESS OF THE BOWELS**

MAY BE RAPIDLY AND EFFECTUALLY
CURED BY THE USE OF
**DR. FOWLER'S
EXTRACT OF
WILD STRAWBERRY**

The medicine with a record of cures extending over 65 years. You don't experiment when you buy it.

Mrs. JOSEPH MACCARTHY, Puntsville, Ont., writes: "It gives me much pleasure to write of the wonderful benefit I have found in your medicine. Last summer it saved the lives of my three little ones. They all took the summer complaint and were very sick with it. The baby would take no food, and after trying many remedies, which were of no use, I suggested we should try Dr. Fowler's Extract of Wild Strawberry. After giving them one bottle I found a great change, and now my little ones are as well as ever. We have never been without it since, and I have recommended it to my friends."

Mrs. B. A. HARRISON, Napanee, Ont., writes: "I take great pleasure in sending you this testimonial of what Dr. Fowler's Extract of Wild Strawberry has done for my family. My daughter's little girl, three years old, took summer complaint and was nearly dead for several days. I thought of your remedy, and I bought a bottle. The first dose gave relief and the third cured her. My son had diarrhoea and a few doses stopped it right away. I advise all mothers to have a bottle of Dr. Fowler's on hand all the time. It is a grand medicine for young and old, and I cannot recommend it too highly. I have tried it in all cases where the bowels become loose. A few doses will check the trouble at once."
