**Richest Nation.**  
The United States is the richest nation in the world.

**A Great Coal Field.**  
St. George's bay, Newfoundland, contains an immense coal field fully twenty miles in length and ten in breadth. It has been estimated that if the output were to reach 250,000 tons per annum the coal bed would not be exhausted in a century.

**Point Barrow.**  
Point Barrow in Alaska is the farthest point north in this country. To get there one must go to Seattle, then by steamer 1,650 miles to Valdez and then 2,750 miles by sled.

**Largest Wooden Building.**  
The parliament building in Wellington, New Zealand, is the largest wooden structure in the world. In Wellington and some other New Zealand towns almost every house is constructed of wood. So likewise are large churches and business houses.

**Algerian Sharpshooters.**  
Many tales are told by travelers of the wonderful skill of the Algerians in handling rifles. The native Algerian would rank with our expert rifle shooters.

**Munjoy Hill Observatory.**  
One of the oldest observatories in Maine is situated on Munjoy hill, in Portland. It was erected in the spring of 1807 and served in the private days of 1812 to announce to the townspeople the sailings and arrivals of Portland's ships.

**Niagara Falls Power.**  
To an electrical engineer, remarks Popular Mechanics, the beauty of Niagara falls is somewhat dimmed as he reflects that the 3,500,000 horsepower is worth more than \$100,000,000 a year.

**The Thumb.**  
The thumb has more strength than all the other fingers together.

**Odd Rubbing Posts.**  
Rubbing posts for cattle, made of whale's jaws, are to be seen in the village of Hawsker, in England, and represent the whale trade formerly carried on at that place. They stand twelve feet or so above the ground.

**The Whale's Laminæ.**  
The age of a whale is ascertained by the size and number of laminæ of the whalebone, which increase yearly. Ages of 300 and 400 years have been assigned to whales from these indications.

**Bath Mats.**  
Bath mats may be made of discarded bedspreads by cutting from the firm part squares of desired size and hemming. These mats are also to be laid up on the floor beside the bathtub when the latter is in use, but should be folded and hung in a convenient place, as they are not heavy enough to take the place of a rug.

**Half Rates for Women.**  
Women, because they eat so much less, only pay half rates in the more old-fashioned of Sweden's hotels.

**Marriage Insurance.**  
Army and navy officers in Germany are obliged to make a deposit of \$7,500 with the government before they are permitted to marry. This draws an income of 3 per cent and at death is refunded to the family or heirs.

**Low Dutch Cities.**  
Most Dutch cities are several feet below the level of the sea.

**Animal Intelligence.**  
Evidence of a mind in all animals, even the lowest, is found by F. W. Hensley. The amoeba exercises the power of choice when it eats, and the tree-like colony of one celled infusorians, called zoöthamnium, after a time ceases to be agitated by jars repeated at intervals, showing that it must remember that a jar is harmless.

**German Silver.**  
German silver contains no silver at all. It is an alloy of copper, nickel and zinc.

**The Lion's Jaws.**  
The lion has an enormous jaw power. An African traveler once pushed the butt end of his gun into a lion's mouth, and the pressure of the jaws cracked it as though it had been struck by a steam hammer.

**A Cattle Bridge.**  
A bridge between England and France would, it is estimated, cost £34,000,000.

**Cloud Formations.**  
The cloud-formation known as "Mare's tails" and "mackerel sky" are invariably three miles high. The highest clouds are ten miles high, and these are composed of minute particles of ice.

**Sunday.**  
Sunday, as the word implies, is sun day—the day of the sun. Men worshipped the sun for a long time before they began to worship God, and Sunday was the day on which the source of light and heat received their adoration. On this day Christ's resurrection is supposed to have taken place; hence the Sunday became the worship day of the Christians.

**Hawking Gloves.**  
Some old hawking gloves have the hands and thumbs made in red velvet, the outside of the hand covered with the finest embroidery in many tones of silk, mixed with metal threads. They appertain to the days of good Queen Bess.

**The Old Time Stagecoach.**  
In 1722 there were, strange as it seems, only six stagecoaches running in all England, and of course these were the only public vehicles for travelers. Even these were a novelty, and a person named John Crosset thought that he wrote a pamphlet against them. "These coaches," he wrote, "make gentlemen come to London upon every small occasion, which otherwise they would not do except upon urgent necessity. Nay, the convenience of the passage makes their wives come often up, who rather than come such long journeys on horseback would stay at home. Then when they come to town they must be in the wade, get fine clothes, go to plays and treats and by these means get such a habit of idleness and love of pleasure that they are uneasy after."

**The Chameleon Goshawk.**  
I know no bird which passes through so many changes of plumage and color of eyes as the goshawk. A young one which I have mounted is about the size of a small hen and is covered with white down. His eyes are pale blue. I colored the eyes exactly from life. When fully grown, the first plumage is dark brown above and the eyes are pale yellow. No one would be likely to suspect this being a goshawk who had seen only adult birds. Later it changes to the dark slaty blue of the adult, and the eye, after passing through all the intermediate changes in color from straw yellow, orange yellow and pink, finally assumes the deep rich red of the adult. I know no other hawk, adds Manly Hardy, writing in Forest and Stream, so handsome as the goshawk.

**The Letter G.**  
The letter G furnishes us a curious bit of orientalism. Its Hebrew name is gimel, camel, from the resemblance of the Hebrew character to the head and neck of that animal. The character was thus almost certainly derived from a picture of that animal, which, reduced to a hieroglyphic and then simplified, still distinctly indicates the shape of the head and neck of the beast of burden familiar to every dweller in eastern lands.

**Infantile Chicken Broth.**  
Customer—What on earth is this broth made of, waiter? Surely it isn't chicken broth? Waiter—Well, sir, it's chicken broth in its infancy. It's made out of the water that the hogs are boiled in.

If you want the best buy the Sackville Oak. It is the leader
