

A home that is free from Draughts.

No heating system will keep your home so evenly warmed and free from draughts as hot water heating. All rooms and hall-ways will be comfortably and healthfully warmed if you install a

Daisy ^{Hot Water} Boiler & King Radiators

This system will keep fresh, warm air throughout the home—free from the dust and dirt of hot air heating, and the ashes and labor of stoves.

There will be no cold rooms in your home when heated by a DAISY BOILER and KING RADIATORS, for the warm water is kept continually circulating through the system, the hottest water being naturally drawn to the part of the house most exposed to the cold.

The fire pot and the fire travel of the Daisy Boiler are designed to get all the heat out of the fuel

burned—none is lost up the chimney.

King Radiators are designed on most artistic lines, and, at the same time, so constructed that the water has a free passage through them.

Each King Radiator is, before and after it is assembled, subjected to a test of one hundred pounds cold water pressure. No possible imperfection can pass that test.

We would like to send you a copy of our booklet, "Comfortable Homes." It will tell you much that you should know about heating homes.
