close to the bowl. The material is a compact grey limestone, and portions of the bowl show traces of the working tools used in shaping it.

This pipe is also from the country of the Tobacco Nation, and was presented by Mr. W. G. Wright, of Collingwood.

FIG. 6.

The pipe represented by figure 6 is the only one in our collection in which the mouth of the face is made to serve as the stem-hole. The workmanship on this bowl is rude, unless we regard it as an unfinished specimen. It was found in the township of Nottawasaga by Mr. W. G. Wright, of Collingwood.

FIG. 7

The pipe of which Fig. 7 is a diagram is made of yellow soapstone. It appears to represent a man carrying a burden, which forms the bowl proper. The stem-hole enters from the front. This specimen shows signs of long use, as none of the outlines are at all sharp. The face markings are nearly all obliterated. Even when new it is not likely that Fig. 7 was a very fine piece of workman-

by the Hurons.
