of Three Units With a Total Car 000 Tons-Undertaken at a Cost of \$1,500

PAGE THREE

Victoria, B.C "July 27 .- The Grand Trunk Pacific Railway's drydock and its surrounding plant, foundry, machine shops, etc., is expected to be ready for busi-ness early in August. Prince Rupert will then have on its harbor front what is described as the finest drydock plant along the Pacific Coast, either in Canada or the United States.

The construction of the dock has been undertaken at a cost of about  $$1,500,000_{\odot}$ . It consists of three units, with a total capacity of 20,000 tons. There will be two end sections of 5,000 tons each, and a middle section capable of holding a heat of 10.000 tons. All the units are interchangeable, and each dock is complete in itself, with pumps and air compressors if necessary all three sections, or units, joined to hold a boat 600 feet long and weighing 20,000 tons.

In addition to the actual dock, there are four other parts to the plant, namely: The foundry, which will be able to make castings as heavy as 12 tons; a boiler shop for marine repairs as well as for the construction of boilers; a machine shop, which is equipped amongst other things with a lathe having a 72-inch head, a ship shed and carpenter shop 160 x 300 feet, and a power house equipped with two large turbogenerators and a 15,000 foot air compressor.

Construction work in connection with the drydock and its accompanying plant has been under way since the beginning of 1912, and the builders will soon be replaced by a staff of operators.

## CANNOT RECOUP LOSSES

## FROM SALVAGED CARGOES.

Washington, July 27.-The United States Bureau of War Risk Insurance cannot recoup its losses, by taking possession of receipts from salvaged cargoes, Comptroller of the Treasury Downey decided. The bureau applied to the comptroller for authority to recover part of its loss of \$401,000 paid as insurance on the American steamer Evelyn sunk by a mine in the North Sea last winter.

Fifty thousand dollars' worth of cotton has been recovered from the vessel, the bureau reports. This money must be covered into miscelianeous receipts of the Treasury, the comptroller ruled. The legal reason for this decision, he says, in that to permit the the New York steamers, and the arrangements for bureau to take the money would be tantamount to increasing the \$5,000,000 appropriation made by Congress for its support. This, Mr. Downey ruled, would
