

Just One Way to BUILD YOUR BARN

if You Want the Best Barn You Can Build

THE "METALLIC" WAY

of Barn Building means "Eastlake" Steel Shingles for the Roof, and "Metallic" Corrugated Iron for the Sides. We want every Farmer who reads this announcement to write us (use the coupon below) and get the cost of "Metallic" Materials for Barns.

We make strong claims for our Materials. "Over 30 years' service and still giving service" is one. "Fire-proof," "Lightning-proof" and "Storm-proof" are others. We want you to make sure for yourself that "Metallic" Materials are the Materials for your Barn.

"Eastlake" Steel Shingles

(The Thirty Year Barn Roofing.)
and

"Metallic" Corrugated Iron

(Staunch as Armour Plate.)

"EASTLAKE" STEEL SHINGLES.—The patent Counter-sunk Cleats and Telescopic Side Locks make it absolutely easy to lay "Eastlake" Shingles. The Side-lock provides a large and commodious concealed gutter. Perfect rain shedding. The Countersunk Cleats hold the butt of the next higher "Eastlake" Shingle tightly against the Shingle below. An "Eastlake" Shingle covers the area of 15 ordinary wood shingles and is attached by only 4 nails, saving the driving of 26 nails. The Metal in "Eastlake" Steel Shingles is the best we can obtain and they are galvanized by a special process—and the galvanizing is applied on both sides.

"METALLIC" CORRUGATED IRON.—Means the difference between ordinary Corrugated Iron and superior Corrugated Iron. To put ordinary Corrugated Iron on the sides of an "Eastlake" roofed barn is to finish a good job badly. Deeper Corrugations made one at a time mean better Corrugated Iron, the easiest to lay accurately and the most durable you can obtain.

"Halitus" Ventilators.—
Let all the bad air out and the good air in—indispensable in a well made barn.

"Acheson" Barn Roof Lights.—A "Metallic" roof light with great advantages—easily laid and strong to withstand storms.

GET THIS FREE BOOK ON BARN BUILDING.

To The METALLIC ROOFING CO. Limited
TORONTO, ONTARIO

Dear Sirs,
Please send me the "Eastlake" Metallic Shingle Book (Free) telling me how to build a barn the "Metallic" way.

I enclose rough sketch and dimensions of the barn I would like to build—please let me know the cost of "Eastlake" Steel Shingles for the roof, "Metallic" Corrugated Iron for the sides.

"Halitus" Ventilators, "Acheson" Barn Roof Lights, (for Light and Ventilation).

Quote price laid down at
Railway Station.
