Where Speed Counts

Suppose a fire started in your plant some night. Five minutes more or less in the time it took the apparatus to get there would make a pretty big difference in your loss.

A Central Station Signal System meets any emergency quickly.

It keeps your watchman awake and on the job. It enables him to send a fire alarm right from the building and then work on the fire while he's waiting for help.

If his signals don't come in at the right time a Special Officer visits your place right away to find out why.

In other words, it is *real protection* in every contingency.
