OUR WORK PAST AND FUTURE

Reposted from the branches indicate that the firain feronores of Manitoba are contemplating holising many gatherings throughout the summer months for purposes of recreation, oscial interconnected discussion of public questions. A heavy demand is made on the central office for speakers to address these gatherings, as there are not many men available for the weak it is important that an effort loss much travel and save as much time as possible. This can best be accomplished by writing the central office, stating about what time would be most syntalic and leaving the central socretary to arrange the date. This, of course, would not apply to there, he have already at their date and counterments for these gatherings should be most syntale and commenced preparations. Arrangements for these gatherings should be made suffered and increased apply to there, a he have already at their date and commenced preparations. Arrangements for these gatherings should be made with care and not left haphazard. Renginher always that a well planned and uncessful pions adds to the prestige of your branch and including opportunities for the development and the left haphazard. Summer outlings among farmers should be encouraged. Apart altogether from the gapourtance of providing opportunities for the development and improvement of farm life, as a means toward better living, there is great need for farmers to meet for an interchange of thought on the many questions affecting the immediate future, now engaging the attention of thoughtful men. NINGA CROP REPORT

NINGA CROP REPORT

At one of our meetings at Ninga we arranged to send in crop reports for this district, and following is report to date. In nearly all sections of the district a heat seeding in done, though a few farmers have not yet finished. The acreage is about the same in most places, a very dight increase, if any thing. Wide we had a very nice rains here on April 10, we have had no moisture since, and now there is a decided drought; on April 30 and May 1 heavy freds have occurred, which may damage the sprouted grains too near the surface, and any grain that was up is fromen off. Out land is being prepared as quickly as possible and a few farmers have commerced seeding, others holding off until warmer weather and in hopes of rain coming soon.

GREAT OPPORTUNITY THROWN AWAY

(From Weekly Sun, Toronto)

(From Weekly Sun, Toronto)

It is reported from Ottawa that the Opposition has formally decided to go straight against the reciprocity agreement and to fight the matter out to the bitter end. If such a decision has been definitely arrived at both the country and the Opposition are to be condoled with. That the agreement, as it stands, will be a good thing for agriculture and that its desired by an overwhelming majority of farmers is beyond question; that it inflicts no more than the merest serateh on a few of the protected interests is proved by the face of the document itself. The only protest against the measure comes from financiers who have profited immensely by the floating of mergers, and from employees deluded or coerced by corporation employers. Even these are opposing the agreement, not because of what it may lead to. If the Opposition makes the fight against the government on this issue it will ally itself on the side of the privileged and protected classes against the unprotected and unprivileged masses. In such a contest it cannot hope to win. If Mr. Borden and his followers had supported the reciprocity measure and forced the battle on other issues its prospects of success would be very much brighter than they are today. Such action would, too, have turned dicussion during the coming election towards some other very important questions—questions which under existing circumstances are likely to be altogether ignored. ircumstances are likely to be altogether
