FINE, VARIABLE PROPERTIES OF COFFEE.—Liebig says, "it comforteth the brain, and helpeth the digestion." Many other writers, both French and English, describe its valuable properties. They say it relieves headache; and Doctor Thorton, in his Lectures on Botany, says, "Those persons who regularly drink Coffee, can never be subject to putrid fever; in fact, a cup of Coffee exhilirates the mental and bodily faculties, and nothing can be more refreshing to the man who studies, or the laborious mechanic."

Admitting that the important qualities described in the above quotations are contained in *Good Coffee*, it is then of paramount importance to the public of Canada to know where they can obtain the article in the most pure and best prepared state, and as there can be no doubt that to preserve the ESSENCE of COFFEE in the highest state of perfection, the Berry must be carefully roasted and ground, SAMUEL COCHRAN begs to direct the attention of the Public to the process adopted by him in the Roasting and Grinding of Coffee.

S. C. roasts his Coffee by STEAM, by which is acquired a desideratum which before was much needed by the COFFEE DRINKER. No taint from smoke; a perfect evenness of roast; a peculiar cleanliness in the operation; and, what constitutes the complete success of this process, the entire preservation of the AROMA, in which the strength, fragrance, and flavour of the Berry are concentrated. Prices: 1s., 1s. 3d., and 1s. 9d. per lb.

Also, TEAS in *every variety in quality* and *price*, a few of which are subjoined, which must meet the views of the most economical housekeeper:—

ANALYSIS OF THE ST. LEON WATER.

I HAVE submitted to analysis the Water from the Springs of St. Leon, and find it to be strongly saline. It contains chloride of sodium in large quantity, with magnesia and lime, partly as carbonate, dissolved by the excess of carbonic acid, and partly as chloride. Like most of the other saline waters in the country, it contains bromine and iodine; in addition to which, I have detected, in small quantities, salts of baryta and strontia which had hitherto been met with only in the Waters of Vareuse. In its general characters, it is allied to the Sources of Carlsbad, Pfaffenquell, and the Interlaken of Caledonia.

The contents of one pound of 7000 grains, as calculated from my analysis, are as follows:—

Chloride of Sodium,	90.477320 grains.
Chloride of Potassium,	1.283400 do
Chloride of Barium,	0.1890 do
Chloride of Strontium,	0.0630 do
Bromide of Magnesium,	4.945040 do
Iodid of Magnesium,	.063462 do
Carbonate of Lime,	.063462 do
Carbonate of Magnesia,	6.671200 do
Carbonate of Iron,	.101300 do
Alumina,	.101300 do

The following testimonials have been handed to us for publication:—

MONTREAL, February 14, 1850.

SIR,—It is now nearly one months since I commenced using the Plantagenet Water in my family, and I have now to state, that the high expectations I then formed of them, from the publication of Hunt's Analysis, have been fully confirmed by my experience of their beneficial effects.

I have found them a most agreeable and effectious aperient laxative, and their continued use seems to agree with the patient, by improving the digestive powers and increasing the appetite.

I remain, Sir, your obedient servant,
WILLIAM SUTHERLAND, M.D.,

To Mr. Larocque.

MONTREAL, February 14, 1850.
