TYPES OF THE HOUSE.

Many Men That Have Won In Spite

of Every Obstacle.

"The richest man in the house," says

L. A. Coolidge in Ainslee's, "is Connell of Pennsylvania, who has accumulated over \$10,000,000 and who has a single

item of income of over \$500 a day.

Connell is a coal operator, one of the

largest in the United States. Fifty

years ago he was working in the mines

as a driver boy at 75 cents a day.

Closely approaching him are Levy of

New York, the owner of Monticello,

who inherited his wealth, and Sprague

of Massachusetts, who acquired his by

marriage. Other rich men in the house,

some of whom are in the millionaire

class, are Sibley of Pennsylvania,

Stewart of Wisconsin, Hitt of Illinois,

Cannon of Illinois, Dalzell and Adams

of Pennsylvania, Ruppert, McClellan

and William Astor Chanler of New

York, Babcock of Wisconsin, Lovering of Massachusetts, Wadsworth of New

York and Burleigh of Maine. It is safe to say that a great majority of the members of the house have little be-

sides their salaries, although there are

few of them who could not earn-more than their salaries if they were to re-

tire from congress and devote them-

driving teams. Needham of California

was born in an emigrant wagon some-

where in Nevada. He is one of the

youngest members of the house. Ad-

amson of Georgia worked on a farm

and hauled goods and cotton. Lorimer

of Illinois, who, while still under 40, is

supreme in the Republican politics of

Chicago, was a bootblack and a car

driver. Cusack of Illinois was a sign

### AIRAS ON LEGAL QUERIES

Kent Law Association Respond to At torney-General's Letter at Their Meeting Yesterday.

a well attended meeting of the Kent Law Association was held Wednesday evening, with Matthew Wilson, K. C.,

presiding. The various questions of law reform were taken up and it was the unanimous decision of those present that st would be a mistake to increase the jurisdiction of division courts because courts would then almost invariably extend over one day, and witnesses would be detained at the place of trial over night and their expenses greatly increased. The cases, with such amounts as would then be involved, awould mean the securing of lawyers. would mean the securing of lawyers and if would cease to be the poor man's count for the trial of little

claims.

It was noticed and fully explained that the total increase of law costs during the past twenty years has arisen from the disbursements for stamps and fees, payable to the various court officers, and it was considered that the best way to reduce the ered that the best way to reduce the cost would be to discontinue the collecting of these stamps and law fees, and make the trial courts open and free to the public. (At litigant v then have to pay no one except his solicitor, and if he succeeded, the solitor should be paid by the party in

The meeting was decidedly against abolishing jurors. Those present thought in some cases jurors were better able to decide the facts than

In answer to the Attorney-General's suggestion as to reducing the num-ber of appeals the Kent Association considered that the most effectual way to accomplish this was to to re-from the law and to raise the standard of the officials, as to secure a patient deliberation and able trial of each case, which would give confidence to contesting parties and prevent them feeling that it was necessary to appeal

the case in order to get a better, considered and sounder judgment.

The meeting was decidedly in favor of increasing the jurisdiction of the county courts so that, as far as would be received and the county courts as the same about the county courts as the same about the county courts as the same about the county courts so that, as far as would be received as the county courts as the same about the county courts as the same about the county courts are the same as the county county as the county count be practicable, all cases should be in the first instance tried in the county where they arose and that there should be but one appeal to the Court of Appeal.

The President, Matthew Wilson, K.

C., was appointed by the Association to attend the meeting in Toronto, called to discuss the matter.

Dr. J. L. Bray concluded the first part of the paperum with an admirable address. He said in substance:
Mr. Chairman, Ladies and Gentlemen:
It is with much pleasure that I appear hear this evening to participate in this interesting ceremony, interesting to all, but of vital importance to those ladies who, after years of study and hard wark, accompanied by many discouragements and disappointments, now stand before you to receive the well deserved fruits of their labor. How often during their watch by night at the bedside of some weary sufferer have they been cheered by the thought of this hour, and now, when they are about to realize their brightest anticipations, they are subdued by the magnitude of the responsibilities entailed on them by the possession of the coveted diploma, and well they might be; for I will outline in a very few words my idea of what constitutes the ideal nurse.

First. Education and perception.
Second. Good general deportment.

Fourth. Powers of endurance, both physical and mental, combined with gentleness of touch and manner and a cheerful and kindly disposition.

These are requisites that go to make up the qualifications necessary to become thorough, competent and successful nurses. And from my relations with you in the hospital and at the bedside during your course of training, and from personal knowledge of one of your number since childhood, I can truly say that the graduates of 1901 possess in a larger measure these 1901 possess in a large measure these requirements and I congratulate them on their attainments and prediet for them a useful and successful

"for into each life some rain must fall, some days must be dark and dreary." But do not be discouraged for "behind the cloud is the sun still shining," and if you do your duty fearlessly, conscientiously and to the best of your ability, you will command the esteem and respect not only of your patients and their friends, but of the whole community in which your lot may happen to be cast.

And now let me bid you farewell with the wish that your londest hopes and highest aims may be realized.

#### CARRIED TOO FAR.

he Fear of Being Deceived or Hum bugged Prevents Many People From Trying a Good Medicine

Stomach troubles are so common and Stomach troubles are so common and in most cases so obstinate to cure, that people are apt to look with suspicion on any remedy claiming to be a radical permanent cure for dyspepsia and indigestion. Many such people pride themselves on their acuteness in never being humbugged, especially in medicines.

medicines.

This fear of being humbugged can be tearried too far, so far, in fact, that many people suffer for years with weak digestion, rather than risk a little time and money in faithfully testing the claims made for a remedy so reliable and universally used as Stuarit's Dyspepsia Tablets.

Now Stuart's Dyspepsia Tablets.

Now Stuart's Dyspepsia Tablets are vastly different in one important respect from ordinary patent medicines for the reason that they are not a secret patent medicine; no secret is made of the ingredients, but analysis shows them to contain the natural digestive ferments, pure aseptic pepsin gestive ferments, pure aseptic pepsin (government test) golden seal and di-astase. (They are not cathartic, nei-ther do they act powerfully on any particular organ, but they cure indigestion on the common sense plan of digesting the food eaten, thoroughly before it has time to ferment, sour and cause mischief. This is the only secret

of their success.

Cathartic pills never have and never can cure indigestion and stomach trou-bles, because they act only on the bowels, whereas the whole trouble is

Stuart's Dyspepsia Tablets, taken after meals, digest the food. That is all there is to it. Food, not digested all there is to it. Food, not digested or half digested is poison, as it creates gas, acidity, headaches, palpitation of the heart, loss of flesh and appetite and many other troubles, which are often called by some other name.

They are sold by druggists everywhere in the United States, Great Britair and Canada. Britain and Canada.

The well is 112 feet 8 inches to the rock and goes 4 feet into the rock where a crevice containing the gas was struck. There is 50 feet of water in the well and the pressure of gas is 21 lbs. to the square inch. The well was put down by J. E. Burk and the flow of gas was struck last Monday.

Mr. Dunkley is new heating his dwelling house with the gas. He will introduce it into his greenhouse at once. Mr. Dunkley was boring for either water or gas and wanted both. He desired the gas for use in heating his greenhouse and he succeeded in heating his greenhouse and he getting what he wanted.
