This Is Earthquake Time.

London, April 3.—Prof. Belar, the seismologist, director of the Laibach Observatory, announces that the general unrest of the earth has been owing during the past three days ad connects the fact with the pres and connects the fact with the presence of large sunspots. Comparing the earth shocks during the first quarter of 1906 with those of the corresponding quarter this year, he remarks that the intensity of these recorded in 1907 was less than half the intensity of those of the preceding year. He adds:—"If the disturbanees of the equilibrium of the earth's sur-face are to result in the average compromise we must await the earthquake now due with some anxiety.

RHEUMATISM ALMOST KILLED

For years Mrs. S. Stahlschmidt, of Humberstone, Ont., was a martyr to rheumatism. "I was so stiff and lame I could scarcely walk," she writes. "An attack striking my limbs made walking impossible. Friends and doctors gave prescrip-tions but I only got relief from Fer-rozone. I took twelve boxes and gained from the first. Te-day I am well, feel stronger, weigh heavier and look the picture of health." Whether muscular or inflammatory, chronic or otherwise, Ferrozone does cure rheumatism and sciatica. 50c. per box at all dealers.

FARMING FOR PRISONERS.

of the Jail For the Insane Is Condemned by Inspector.

Condemned by Inspector.

The 39th annual report of the inspector of prisons and reformatories was presented to the Legislature last week, the annual statistics of which showed 44 jails and 13 lock-ups in the province with a total expenditure of jail maintenance of \$158,174 for 1906, against \$163,268 in 1905. The cash revenue of the jails was earned at Perth, Whithy and Woodstock, amounting to \$115, with an average cost for each prisener of 22 cents per day in every county jail in Ontario, against 25 cents in 1905. In 1906 there were 10,810 committed to jails, a decrease of 225. Notwithstanding this decrease the fact remains, Inspector Rogers points out, that with a population of a little over 2,000,000 there were nearly 11,000 persons during the past year committed to the jails of the province. The number of insane committed during 1906 were 309, against 396 in 1905.

Of those committed during the year, 3,837 were married and 6,973 uingle. There were but 25 per cent. who could be labelled temperate, against 26 per cent. the previous year. Less than 16 per cent. could not read

Tendencies to Crime.

"It may be safely averred," the report says, "that the tendencies to crime change with conditions. It is becoming more and more apparent that the old deterrent forms of punishment are impotent as a factor in reformation, and that the temperament, environment and associations of reformation, and that the tempera-ment, environment and associations of each prisoner when studied help vast-ly in the work of reformation, which should be the grand policy pervading the treatment of all prisoners serving sentence. Punishment to a certain extent is necessary, but regeneration of the unfortunate subject of crime should be the main objective. Before any change can be made regarding should be the main objective. Before any change can be made regarding our criminals in the province we must make overtures to Ottawa, the foundation head of criminal authority and without that power in our Provincial Legislature we must depend upon the Federal Government to amend the criminal law, to the humanely, intelligent and rational plane of the probation system and the indeterminate or indefinite sentences, a system which has been in operation in Australia and New Zealand for the past 25 years with the most satisfactory results.

Favors Farm Project. The inspector of prisoners considers an industrial farm as an outlet of Toronto prisons would be an advantage and a gain to the province.

The attention of sheriffs has been called to the fact of immigrants committing crimes here and becoming

called to the fact of immigrants committing crimes here and becoming a charge upon the state, and points out the provision by which such undesirable foreign element are to be returned to the country from whence they came at their own expense, if able, or otherwise at the cost of the municipality of which he or she is resident. resident.

The use of jails for the insane is deprecated, and the report shows that the Government offers material promise that this practice will cease, and those mentally afflicted will be sent directly to the asylums. In Australia there are reception houses for the purpose of confining those temporarily demented from where, after a certain time, they are either discharged or sent to an asylum, after proper medical pronouncement.

sent to an asylum, after proper medi-cal pronouncement.

The inspector urges the establish-ment of a large industrial farm at some suitable location, and that all prisoners from the unorganized dis-tricts west of North Bay, instead of being transferred to the Central Pris-on, be sent thereto. During the past three years it has cost the Govern-ment to bring prisoners from Kenora, Port Arthur and other remote points to the Central Prison, \$10,000 for 323 prisoners.

Waste of Public Money. It is also suggested that it would be a waste of public money to try and remodel many of the old antiquatand remodel many of the old antiquated jail structures, and in the end be disappointed. The modern jail building, without the heavy stone work, with steel equipment, latest heating apparatus, ventilation as approved by best scientific methods, and every other convenient, sanitary and up to date system, is the jail of the future, and the one that will be the cheapest, all things considered.

The inspector points out the necessity of keeping first offenders apart from hardened and habitual criminals, and persons awaiting trial should be treated in every way as innocent persons until the ruling of the court declares otherwise.

The inspector recommends roadmaking and all sorts of outside work on city or town property, where it does not come into competition with honest labor, and points to the improvements at Riverside as an example low usefully prison labor can

Dolls Destroyed In Fire.

An amusing scene was witnessed recently at a fire at Vincennes.

A factory in the Rue Monereuil caught fire, and it was noticed that what appeared to be a large number of children were being thrown out of the windows. The police arrived with fire ladders, and a rumor spread that a large number of children had been burned to death.

It was quickly discovered, however, that the place on fire was a doll factory, and the "children" were merely large dolls. Over 2,000 dolls were destroyed, but no one was hurt.

Sunday Observance In Boston.

Battle royal is being waged this week in the committee rooms of the Massachusetts Legislature on the great issue of Sunday observance. The great issue of Sunday observance. The last Legislature appointed a commit-tee of seven to study the situation and to report to the present general court. The committee was made up of four Roman Catholics and three Protes-Roman Catholics and three Protestants. The majority, consisting of three Catholics and one Protestant, recommends Sunday sports and games, provided they do not involve a money consideration, nor disturb public worship; but favors action that will do away with entertainments now going on under the guise of charity and religion. This recommendation would banish the Sunday theatre, which now flourishes in Boston, seven being opened on a recent Sunday evening, and the entertainments being of a lower order generally than ing of a lower order generally than on week-day nights.
