

Crops Are Plentiful.

Reports From Various Sections of Ontario.

The Damage by Rain Not Nearly So Great as Anticipated.

Hay Suffered Severely in Spots - But Prospects on the Whole are Bright. General Business Outlook Good.

The following telegraphic reports (dated July 30) show the present state of the crops and the outlook in various sections of Ontario:

Acton—Complaints are pretty general of fall wheat being sprouted by the rain. Oats where heavy having, however, but may rise. Other crops all very good. There never were better prospects of a good general crop.

Ayr—The late heavy rains have caused serious damage to the wheat crop in this vicinity, particularly white wheat varieties. The crop, however, will be serious. The storms came, and it has sprouted badly. The hay crop is very large and all secured. Prospects for the other crops very good so far.

Aylmer—The recent rain has not affected the wheat crop. The last two days enabled the farmers to harvest their wheat, which is in first-class shape, and will average a fine crop. Oats, corn and peas a fine crop. The root crop promises to be away above the average.

Blenheim—The recent rainfall was not as heavy in this vicinity as further north and east. The hay was all harvested about a third of the wheat crop is in the barn, and the balance of the wheat harvest has been delayed, but no damage so far done. Two days' dry weather will see the whole wheat crop harvested and in good condition. The yield will average 20 to 25 bushels per acre. Oats, barley, and peas, all good average. Very little damage done to the berry crop, only one place missed. In the eastern part of the township of Harwich, on the low lands, the bean and corn crop was damaged to some extent, but in this section the crops have been benefited. The outlook promises good, and with dry weather a good yield all around is expected.

Brantford—The late rains have to some extent injured the wheat. Some reports say it is growing, others as very soft; other that it has darkened in color, otherwise there are prospects for good yield. Late apples, pears and plums are plentiful.

Brussels—The recent rains had a bad effect on haymaking. Clover suffered the most. What was cut could not be saved. The timothy did not suffer so much, and taken altogether the hay crop will be sufficient. Fall wheat was considerably knocked down, but too far advanced to suffer much. Oats, peas, corn and all roots will be more than an ordinary crop.

Burlington—Wheat that was in the fields during the recent rains has been somewhat damaged by growing. Especially is this the case with the white variety, the red seemingly withstanding the rain better. Barley will be better, but discolored, but as this grain is now used mostly for feed the color does not matter much. On the other hand, the rain will benefit all other crops. Prospects generally good.

Cayuga—All wheat was cut and most of it in the fields. Any wheat that was lying down had commenced to grow, but wheat well shocked sustained no damage. Vegetable crops were damaged by flood in the Grand River. Wheat is an excellent crop, some that has been threshed, from 25 to 30 bushels per acre. Oats and peas are a poor crop, but recent rains will help. Fall wheat, which is ready for cutting, and is the heaviest and best that has been in this section for the last twenty years, is down in many places, but difficult to harvest. Spring wheat, oats and peas are exceedingly heavy, also considerably damaged. About the average crop is secured in good condition, but all that was cut and lying in the fields is worthless. Fruit, especially apples, are looking well, and other root crops are about an average. Weather unsettled and harvesting at a standstill for a week.

Chesley—Rains caused thousands of dollars of loss to the farming community in this locality. Fall wheat, which is ready for cutting, and is the heaviest and best that has been in this section for the last twenty years, is down in many places, but difficult to harvest. Spring wheat, oats and peas are exceedingly heavy, also considerably damaged. About the average crop is secured in good condition, but all that was cut and lying in the fields is worthless. Fruit, especially apples, are looking well, and other root crops are about an average. Weather unsettled and harvesting at a standstill for a week.

Leamington—The crops in this vicinity could scarcely be better. Hay is a heavy crop and well saved. Wheat averages 20 bushels to the acre, and is safely harvested. Oats are a large crop. The corn crop is looking well, from the early cool weather, and is now doing well. There has not been much rain, and the storm which did so much damage in some places did not reach this locality.

Delaware—Hay will almost average three tons to the acre. Most of it well cured and cared for. Wheat excellent, nearly all cut and in. Barley heavy, but not so well saved. Prospects saw them better; 60 to 75 bushels per acre. Corn coming on fine. Potatoes give a splendid showing; the early ones are large and plentiful. Apples are small crop. Small fruits abundant. Root crops, especially turnips, are in consideration. Taking all things into consideration, there had better crops in this locality.

Elora—The hay crop in this locality is depreciated 50 per cent, and the cut hay is largely destroyed. The fall wheat is considerably damaged; the barley is beaten down badly, and the other spring crops are more or less damaged. The crops generally are expected in there will be a good crop.

Embro—In this neighborhood the crops on the whole are very good. Fall wheat and hay are above the average, although the continuous rain did considerable damage to the latter. In a few instances wheat, which had been cut before the rain had been cut and shocked, is a good crop. The pea crop will be light. Corn will not be a very large crop.

Erin—Owing to the wet weather much damage has been done to large fields of hay. Fall wheat in many places has begun to grow again, but if the weather settles it may not be seriously injured. Barley is very good, but badly blackened, and will be of little use for sale.

Hespeler—The rains have seriously affected the grain crops. A great deal of the wheat had been cut and shocked, and a large proportion of it has sprouted. Standing grain has been beaten down and damaged. Wheat may be much discolored. A good deal of the hay crop was injured before it was cut in. Late apples and root crops will be benefited by the wet weather.

Hanover—The steady downpour of rain ceased yesterday, but not before a great deal of damage was done. The hay crop here was only partially saved, and what remains out is almost a total loss. The fall wheat is

about ripe and a few fields cut. It is reported growing in the sheaf and rusted. The barley, oat and pea crops are badly damaged and great loss will result. Much damage is sustained by the Saugeen river overflowing and carrying hay and other crops from the lowlands. The crops in this section had promised to be exceptionally heavy.

Ingersoll—The crops are looking very promising. The recent rains have favored the growth. The hay crop has been very large, while the wheat harvest has been somewhat "catchy"; yet most of the crop has been saved. In the past two or three days of dry weather a large amount has been put under cover. The yield will be above average. Other late grains look fine, and no doubt a large yield will be harvested. The pastures have been kept in excellent condition, and as a result the cows will fall off in their supply of milk. This is a very important matter in the Oxford dairy district.

Kincardine—The heavy rains have done considerable damage to the hay. In a few cases farmers have been able to save their crops, but they have been very much damaged. The majority had only a part out, which had to remain in the fields, and some of it will not be of much use. Wheat, however, if no more rain comes, will be saved, although somewhat ripe. The wheat has in part been cut, but the rain, but the most of it will be saved. The quality and yield will be good. Barley and oats look well, and have not been affected. If weather proves favorable the returns will be good. Early peas will suffer from mildew. Root crops are good, fruit short. On the whole, the outlook is good.

Listowel—Grain and hay in this section was above the average. A great deal of hay was cut and in the fields when the rain came on, and is about the worst wheat that has been seen slightly damaged. Fruit crops very light. There is a great crop of hay, but unfortunately a very large quantity of it is still out and much of it has been damaged with rain. There is an immense crop of fall wheat in this district this season, all ready to cut—more than ready in fact, but weather has been contrary. It is a great sight to see a field after the rain, the finest wheat ever looked upon waiting for the harvester. The later crops are looking well, though the oats are rather short. Roots are looking well since the rains have ceased.

Niagara Falls—The recent heavy rain will have a damaging effect on all crops in general. The cereals standing out will certainly suffer the most. The root crops, however, have not been affected. The peach crop, which will be limited, will not be assisted in any way by the wet weather. Old City—The rains did not do much damage to the hay and wheat crops in this section. A large amount had been harvested in dry shade. The outlook is very good generally.

Ottawa—The heavy rains of the past few days have worked considerable damage to crops in this district. A great deal of cut hay will be a total loss, and there is fear that not many of the root crops on low-lying lands.

Parkhill—Crops are likely to be as good as have been harvested for years, both in quality and acreage. Recent rains have done no damage to crops. A very serious damage has been done to wheat and barley in this section by the heavy rains. Very little of either kinds of grain has been stored when the storm came, and about the entire crop has badly sprouted. Oats, peas and roots will be benefited somewhat, what, and with favorable weather will give a big yield.

Pelee Island—The rain has done considerable damage to late fruit crops. No damage reported. Wheat, barley and oats a heavy crop; mostly all harvested.

Port Elgin—Large quantities of hay will be only fit for the manure pit, although there is considerable to cut. Yet, if the weather is favorable this can be saved. Grain cutting has just begun, and promises an abundant yield. Very little damage from the wet, except on lowlands. All other crops are looking well. Small fruits are rather short. The apple crop will be very short.

Port Rowan—The crops generally throughout this section are very good. If any damage was done by the recent rains, and the present outlook is favorable. The prospects for the township of South Walsingham and Houghton are good.

Port Stanley—Hay has turned out for the last twenty years, is down in many places, but difficult to harvest. Spring wheat, oats and peas are exceedingly heavy, also considerably damaged. About the average crop is secured in good condition, but all that was cut and lying in the fields is worthless. Fruit, especially apples, are looking well, and other root crops are about an average. Weather unsettled and harvesting at a standstill for a week.

Simcoe—The past two days have seen a great change in the crop prospects. The yield of wheat was unexpected, and the heavy rains did no damage. Yesterday, however, there came reports of the growing of wheat. The wheat sprouted and grew an inch in one night. Farmers worked night and day separating the sheaves and putting them out to dry.

Southampton—The general appearance of crops in this district would promise more than an average. Oats, wheat, fair average. Peas, oats and barley are all looking well, and promising. Prospects are reported to be good for all kinds of root crops.

Strathroy—The rains up till today have not done a great deal of damage. Some varieties are reported to be sprouting, but most of the wheat was not injured on account of the fine, drying winds that followed, and the greater portion has been gathered in. About 5 o'clock today (Friday) a heavy thunder storm passed over this section, accompanied by hail, which lasted about ten minutes, the largest hail falling in the memory of the oldest residents of this place, some being as large as pigeon eggs, doing a great deal of damage to the pea and corn crops and leveling the oat fields.

St. Marys—About 50 per cent of the hay crop in this section has been badly damaged by the recent rains. Root crops are excellent, and grain crops have not been better for many years. On the whole the prospects are most encouraging.

St. Thomas—The recent rains have not seriously affected this district. Fine weather for two days has enabled the majority of farmers to harvest their wheat in good shape. Wheat very heavy and plump sample, will probably yield considerably above the average. All other grains looking well and promising full average. Hay very heavy—fully 50 per cent above average. Root crops yet uncertain, but looking well. Apples very few; small fruits very abundant.

Tilsonburg—Fall wheat is mostly all out and is not damaged by the rain. It is a good crop. Oats and peas have improved by the recent rains. Oats, as a rule, are short, but well headed. Peas a good crop. Corn is very late; not as good as last season. Barley, a smother crop, but looks well. About a quarter of the hay crop is not saved, and is being ploughed in the fields.

Tiverton—The outlook in this district for a bountiful harvest is bright, and merchants and business men are

looking forward hopefully to a big fall trade. The hay crop, which is abundant one, has been somewhat damaged by the rain, but the larger portion of it has been safely gathered and what remains uncured is in a good state of preservation. The fall wheat is well advanced, and will be an excellent crop. Already farmers have started cutting, and by the beginning of the week harvesting will be general. Peas in most cases are not a good crop in this vicinity, although some fine fields are reported. On the whole, the crops will be away ahead of the average, and if the prices are fair farmers will find themselves well off. The fruit crops, however, will be very light. Apples are almost a total failure, owing, no doubt, to the cold, backward spring and the late June frosts. The excellent pasturage has given the cheese industry an impetus it was much in need of. The commercial outlook is very promising, and merchants and business men are much pleased.

Wallaceburg—The recent rains in this vicinity were not heavy, and no serious damage was done. The greater portion of the hay crop had been harvested before the rains set in. Wheat is mostly cut, and being housed in good conditions. Threshing has already commenced on many farms. The prospects for an all around average crop are good.

Walkerton—The rain of the past few days has caused considerable damage to the crops in this neighborhood, but not so much as was at first feared. Most of the hay was already saved. Standing grain was beaten down pretty flat, but otherwise being little hurt. Some of the wheat in shock is sprouting a little, but if fine weather sets in most of it will be saved. Other crops are uninjured.

Watford—The grain crops in this vicinity have not been better for years, and the yield will be considerably above the average. The hay crop is immense, and although a portion of it was damaged by the heavy rains, there will be a large surplus for market. The wheat harvest is not far advanced as in most years, and therefore suffered less from the recent storms. The weather is now favorable, and rapid progress is being made with the harvest. Corn and the root crops are doing remarkably well. Apples are almost a complete failure.

Wingham—Hundreds of tons of clover are ruined by the rain. All clover that was cut is black and rotten. Many farmers had the hay in barn before the rain came, and many not cut yet. The wheat, oat and barley crop is magnificent, and old farmers say they never saw prospects better. The oat crop is superior to anything we have had here for years. Horses, cattle and sheep are doing well. Higher prices than they have for many years past, while the demand for hogs is simply wonderful, sucking pigs selling from \$3 to \$3.25 each.

Double Accident

On the G. T. R. Near the Overhead Bridge.

Train Derailed and Run Into Whistle Repairs Were Going On—Damage Slight.

Two accidents on the G. T. R. near the river delayed the Wabash express, timed to leave here about 8:35, for over two hours last night.

Freight train No. 90, from the tunnel, in charge of Conductor Finch, of Saranac, and Engineer Renton, of Point Edward, steamed hastily along about 8 o'clock with 26 loaded cars. While crossing the river bridge a draw-bar was pulled out, which, falling at right angles across the track, derailed one of the cars. The engine and the rest of the auxiliary was sent for and got to work immediately. Progress was slow, as the bridge was not the most favorable place in the world to jack a car.

The semaphores near the overhead bridge, slightly damaged by the recent rains, and the present outlook is favorable. The prospects for the township of South Walsingham and Houghton are good.

THE SECOND ACCIDENT was simply the outcome of the first. No. 95, with sixteen loaded cars in charge of Conductor Schwab and Engineer Baxter, of Windsor, rattled along over the city bridge and over the track to near the semaphores. The train was coming at a pretty stiff gait, and the small engine, a late crop, but a semaphores he called for brakes and reversed his engine, but despite all his efforts to hold the train, he went ahead. The rail was slippery and the cars of the train passed under the semaphores, and did not stop until the engine No. 794, crashed into the side of the engine and the rear portion of the van were smashed, but no one was hurt.

The damage will be light, and it is fortunate that the accident was not so serious. The engine and the engine are in the repair shop.

A PRINCIPAL'S DISMISSAL

London Chronicle Criticises the Action.

London, July 30.—The Daily Chronicle devotes an editorial article to the dismissal of E. Benjamin Andrews from the presidency of Brown University, which action it regards as the most serious blow the capitalist oligarchy has yet struck at such educational and intellectual liberty in America. The Chronicle adds: "There is no doubt that, like Prof. Bemis, who was dismissed from the University of Chicago, Prof. Andrews was dismissed because he warned his countrymen against the growth of great monopolies. It seems certain that a conflict is approaching that will shake the union as it was shaken by the great slavery question. It looks as though the splendid millionaire endowments of American universities had the unworthy motive of the promotion of the interests of the monopolists. We anticipate a great wave of opinion against the pretensions of the monopolist class as dangerous to freedom. This movement will lead to the substitution of public for private control of universities and the substitution of state for private colleges and universities."

Piles Cured in 3 to 6 Nights - Itching, Burning Skin Diseases Relieved in One Day.

Dr. Agnew's Ointment will cure all cases of itching piles in from three to six nights. One application brings relief. For blind and bleeding piles it is peerless. Also cures Piles, Rheum, Eczema, Barber's Itch and all eruptions of the skin. Relieves in a day. 25 cents.

For sale by C. McCallum and B. A. Mitchell.

GALLEY HOLDS THE FORT

And is Crowned King in the Hearts of the People of London.

MULTITUDES OF THE RESCUED

Worship at His Shrine, Praising and Lauding His Name as No Other Man Has Ever Been Praised Before—His Noble Work is Not Confined to Any One Section, But Extends to Almost Every Street in the Entire City, Where Grateful Words of Praise Rise Daily From the Lips of His Grand

ARMY OF CONVERTS.

WHO ARE INCREASING IN NUMBERS DAY AFTER DAY IN THE STRONG LIGHT, INTIMACY AND EXPERIENCE OF HIS MARVELOUS POWER OVER DISEASE.

Galley's Noble Work is Shown on Every Hand—In the Homes of the Rich and Poor Alike it is the Same Joyful Story of Health Restored and Disease Conquered—The Vast Importance of Galley's Work Cannot be Estimated, Its Value or Its Worth Truly Known, in a Few Short Sentences Which Appear in the Newspaper Press—There is Something Beyond All This—The Unspeakable Joys of the Cured, Which No Language Can Estimate or Cold Type Portray—The Benedictions that Rise from Hearts Innumerable.

Galley Believes that there is no Cause so noble in Its Character as That of Preventing and Mitigating Human Suffering—The Intuitions of the Heart Teach This Need, and Carry Us on and out of the Twilight of Selfishness Into the Perfect Conception of Man's Duty to His Fellow—Truly, That is a Noble Purpose, and From Which Galley Will Not Abate One Jot or Tittle Until the Dread Tyrant Disease, in Whatever Form, Has Been Vanquished.

Galley Invites Those Who Have Tried for Years and Months to get Well Without Success, to Come and Consult His Specialists—Not a Cent will be Charged for Advice That May be Worth Thousands of Dollars—Those Who Have Been Given up as Incurable Are Especially Solicited to Come—Galley's Doctors Will Tell You Plainly Whether There is Hope or Not.

FROM THE LIPS OF PEOPLE THEMSELVES YOU SHALL HEAR THE TRUTH

AN OLD LADY 77 YEARS OF AGE TELLS A MARVELOUS STORY OF WHAT GALLEY'S REMEDIES HAVE DONE FOR HER.

MRS. C. W. PARKER, living at 562 Richmond, street, London, says: "The effect of a single dose of Galley's Dyspepsia Cure has worked wonders for me. I was suffering intense depression in region of heart, and experienced great difficulty in breathing, constantly doctoring, but did not seem to get any relief. One dose of Galley's Dyspepsia Cure has worked wonders for me. I feel better, and have been able to sleep. Have felt well ever since I began the treatment."

A WELL-KNOWN DRESSMAKER IN THE FOREST CITY GIVES HER EXPERIENCE.

MISS M. EDWARDS, 86 King street, says: "Galley's Rheumatism Cure has given me speedy relief, after only a single dose. I have been unable to remedy for any money. Can heartily recommend it to others."

A G. T. R. BRACKMAN SPEAKS FOR GALLEY.

JAMES LOCKIE, 64 Back street, says: "Galley's Rheumatism Cure is indeed a marvelous medicine. In less than 24 hours I was able to walk about after being laid up for over a week with inflammatory rheumatism."

MRS. TEGG TESTIFIES.

MRS. E. TEGG, 701 Dundas street, London, Ont., says: "I have been a constant sufferer from rheumatism in its most severe forms. Was so bad that I could not sleep for the pain and agony. Have only used Galley's remedies for a few days, and can say that I have obtained complete rest and genuine sleep for the first time in many months. Tried many doctors, but found no relief until I began Galley's new system of treatment."

ANOTHER OF THE SAME.

JOSEPH FORTNER, 455 Dundas street, London, says: "Galley's Rheumatism Cure has worked wonders for me in a few hours, and I can hardly realize that those little pellets have accomplished so much."

A LABORER TESTIFIES, TOO, FOR GALLEY'S DYSPEPSIA CURE.

C. WARNER, 493 Talbot street, city, says: "One small vial of Galley's Dyspepsia Cure has done more for me than ten years of doctoring and using all kinds of patent medicines. Galley's Cure has worked wonders for me. I feel better, and have been able to sleep. Have felt well ever since I began the treatment."

CURED IN A FEW HOURS.

JOHN LANG, 455 Dundas street, says: "I was badly tied up with rheumatism for a number of years. Had doctors in vain with all kinds of medicines, and so-called cures, but did not get relief even. Have used Galley's Cure for Rheumatism but a few hours, and experienced the most relief from pain I ever did. Have not had any pains since I began the treatment, and believe a cure has been effected."

GALLEY CURES MRS. ELIZABETH LEMAGE OF RHEUMATISM.

MRS. ELIZABETH LEMAGE, 333 South street, city, says: "I have been a resident of the city for more than twenty years, and am well known in the community, and the testimony I give can be relied upon. I was cured from severe rheumatic pains that had troubled me for years, by using one 25c vial of Galley's Rheumatism Cure in less than three days. It is the most marvelous cure for rheumatism I have ever seen, and I shall never be without it again. Can heartily recommend it to other sufferers."

MR. BEN KNOBBS CURED OF AGONIZING DYSPEPSIA.

MR. BEN KNOBBS, 19 William street, city, says: "I had suffered for years and years with the most acute form of Dyspepsia; was obliged to confine myself to the most simple diet, and even then what I ate caused great distress and wind on my stomach. Tried a great many so-called remedies, even other homeopathic, but believe Galley's new system of treatment is superior to all. After a short trial of the Dyspepsia Cure I now find my appetite much better; the distress after eating has ceased, and I enjoy splendid health."

MEDICAL ADVICE BY MAIL.

Galley's new system of medicine is so perfectly arranged that sufferers at a distance, unable to see the great Homeopathist, can be treated equally as well as though present in person. If you cannot come to London, send for GALLEY'S GUIDE TO HEALTH, with blank forms for information and advice. Your case will receive immediate attention from members of Galley's staff of physicians, who attend distinctly to this work and no other. No charge will be made for medical advice by mail.

Remember, Galley's Specialists are at Your Service from 8 a.m. until 8 p.m. Absolutely Free.

GALLEY WARNS THE PUBLIC!

Galley desires to state in the interest of the sick that his Medical Institution has no connection with "Yankee" Medicines. Companies doing business in other places. Galley's offices are right here in London, and the great homeopathist is personally present. His offices are permanently located at the address given below, where consultation and medical advice are offered absolutely FREE to the citizens.

"THE WHITE HORSE" OF BERSHIRE.

Perhaps the biggest horse in the world is the "White Horse" of Berkshire, England. It is a figure of 170 yards long, and the ear is fifteen yards long. It can be seen for sixteen miles. When the time comes to clear out the ditches, the people make a kind of picnic of it, and play all sorts of rustic games. Who made the "White Horse," or what for, is not known for certain, though King Alfred has been mentioned in connection with it. It is certainly very old.

A SENSATIONAL AFFAIR.

"My hair turned from raven black to snowy white in a single night." "That's nothing. I went into a pawnbroker's shop once and stayed only five minutes. When I came out my watch had turned from gold to silver."
