ONTARIO COAL CO'Y MPORTERS OF THE CELEBRATED 144

LEHIGH VALLEY COAL.

POSITIVELY THE VERY BEST IN THE MARKET. 30,000 tons of this brand of coal used by the Waterworks department of the city of Toronto during the past three years. The records show more gallons of water pumped per ton of coal than the department ever pumped with other grades of coal. We give more heat per ton of coal than possible tor any other grade to give.

THE BEST IS THE CHEAPEST. We also furnish only the best grades of soft coal for grateuse. In steam producing coal we handle exclusively the unexcelled brands, known as Reynoldsville, Soldier Run and Sanday Creek. Best quality of Beech and Maple and Pine Wood always on hand.

From June 1885 to June 1886 we sup plied the Toronto Water Works 8604 tons of our coal, which pumped an average of 421,479 gallons per ton. The results obtained from Lehigh Valley Coal supplied to the same institution from June 1887 to June 1888 was only 362,871 gallons per ton of coal, and after engines and pumps were thoroughly overhauled under the supervision of the present engineer and put in better condition than ever before, from June 1888 to June 1889 the results obtained were only 415,992 gallons per ton of coal.

The total average of the coal supplied by us was as above 421,479 gallons per ton of coal. The total average of the coal supplied since our contract up to June 1st, this year, has been 398,971 gallons per ton o coal. Our coal speaks for itself wherever used
